BATTLE OF TUKAYYID

CATALYST game labs

SUPPLEMENTAL

INTRODUCTION

Battle of Tukayyid Supplemental expands upon the options found the *Battle of Tukayyid* campaign book in the following manner:

Expanded Region Terrain Tables: The Terrain Tables found in *Battle of Tukayyid* consist of the modern mapsheets currently available for purchase. However, there are dozens of older maps many players have in their collection, in addition to new *MapPack* products coming soon. This section provides Expanded Terrain Tables to replace those found in *Battle of Tukayyid*, allowing players to use the full range of all mapsheets ever published for *BattleTech*.

'Mech Availability and Random Assignment Tables: As with the Terrain Tables, the 'Mech Availability and Random Assignment Tables in *Battle of Tukayyid* consist of the 'Mechs available as part of the *Clan Invasion* Kickstarter campaign. However, historically, many other 'Mechs appeared on Tukayyid. These tables allow players a wider breadth of designs to choose from when building their Tukayyid forces; however, record sheets for the full range of 'Mechs included in these expanded tables are not included in this supplemental.

Strategic BattleForce: The Battle of Tukayyid was the largest conflict of the Clan Invasion. Typical *BattleTech* games only cover small, though often strategically important, missions amid the larger battles. With the *Strategic BattleForce* rules found in *Interstellar Operations*, players can fight those larger battles. This section includes the rules, maps and Formation Record Sheets to play out one large-scale game for each Clan Campaign on Tukayyid. Finally, rules are provided so players can create their own sheets and campaigns.

Strategic BattleForce Record Sheets: All the Formation Record Sheets needed to play through the seven *Strategic BattleForce* scenarios above, along with blank ComStar and Clan sheets for players to create their own units.

Battlefield Support: Combined Arms: A Battlefield Support: Combined Arms worksheet makes those rules, found in *Battle of Tukayyid*, easier to use (see p. 27).

Record Sheets: Over 200 record sheets covering every 'Mech listed on the Availability and Random Assignment Tables in *Battle of Tukayyid*.

Strategic BattleForce Mapsheets: The seven large-scale maps included in this .zip file can be printed out by players for their own use.

For more information about Tukayyid and the people who lived and died there, please see: *Era Report: 3052*, the *Blood of Kerensky* trilogy, particularly *Lost Destiny*, the novel *Falcon Guard*, and the *ComStar*, *Jade Falcon* and *Wolf* sourcebooks.

This campaign is intended as a companion to the *BattleTech: Clan Invasion* boxed set and many of the miniatures which comprised the *BattleTech:* Clan Invasion Kickstarter, as well as *MapPack: Grasslands* and *MapPack: Battle of Tukayyid*. The majority of this campaign should be playable with those products. The *BattleMech Manual*, *Technical Readout: Clan Invasion* and *Record Sheets: Clan Invasion* may also be useful. The *Total Warfare* rulebook is recommended for players seeking the full rules for infantry, combat vehicles and aerospace units beyond the Battlefield Support rules included here. This campaign may also be played with the *Alpha Strike* ruleset, as found in *Alpha Strike Commander's Edition*.

EXPANDED REGION TERRAIN TABLES

The Terrain Tables found in *Battle of Tukayyid* consist of the modern mapsheets currently available for purchase. However, there are dozens of older maps many players have in their collection, in addition to new *MapPack* products coming soon.

Players seeking to use these mapsheet products—including older mapsheets currently on their shelves—in their Tukayyid campaigns may simply replace a roll on a Terrain Table found in *Battle of Tukayyid* with the corresponding table in this section; players should re-roll any mapsheet they do not have available.

Each table name includes a page reference to its corresponding table within *Battle of Tukayyid*.

Abbreviations: MP = MapPack, MS = Map Set, MSC = Map Set Compilation, BB = *Beginner Box*, AGOAC = *A Game of Armored Combat*, and CI = *Clan Invasion*.

EXPANDED 'MECH AVAILABILITY & RANDOM ASSIGNMENT TABLES

As with the Terrain Tables, the 'Mech Availability and Random Assignment Tables in *Battle of Tukayyid* consist of the 'Mechs available as part of the *Clan Invasion* crowd funding campaign. However, historically, many other 'Mechs appeared on Tukayyid.

Players seeking expanded options for 'Mechs to take part in their Tukayyid campaign may simply replace a choice from an Availability list or a roll on a Random Assignment table in *Battle of Tukayyid* with the corresponding list or table in this section. Each section below includes a page reference to its corresponding table in the *Battle of Tukayyid* campaign book.

To field all of the 'Mechs listed below, players will need to have access to additional record sheets beyond those found in this supplemental. (Each list's name includes a page reference to its corresponding table within that campaign book.)

STRATEGIC BATTLES

The Battle of Tukayyid was the largest conflict of the Clan Invasion. Typical *BattleTech* games only cover small, though often strategically important, missions amid the larger battles. With the *Strategic BattleForce* rules found in *Interstellar Operations*, players can fight those larger battles.

A CHANGE OF SCALE

In a typical *BattleTech* game, a single playing piece represents a 'Mech, combat vehicle, one infantry squad, and so on. In *Strategic BattleForce*, each playing piece is a Formation of a Trinary (fifteen BattleMechs) or pair of Level IIs (twelve BattleMechs). Attacks are received, and damage applied, to Units (Stars of five BattleMechs, or Level IIs of six BattleMechs).

The scale of play is similarly adjusted on *Strategic BattleForce* mapsheets; rather than 30 meters per hex in *BattleTech*, one hex in *Strategic BattleForce* represents 500 meters, or half a kilometer.

Strategic BattleForce rules are found in *Interstellar Operations* (see *Strategic BattleForce,* p. 230, *IO*). The following clarifications to those rules apply to the scenarios and maps described in this section.

Stacking: *Strategic BattleForce* allows a single friendly BattleMech Formation to be in the same hex as a single friendly infantry Formation (see *Stacking*, p. 234, *IO*). This rule is applicable to most Clan forces, in which a Unit is either a Trinary or Binary of BattleMechs or a Trinary or Binary of Elementals. However, ComStar often employs a more mixed composition of Units. To account for this, a Formation listed as having mixed (MX) Unit types may stack in the same hex as a friendly mixed or infantry Formation.

Water: *Strategic BattleForce* allows for water hexes to be either wider (7 to 12 *BattleTech* hexes wide) or narrower (2 to 6 *BattleTech* hexes wide) (see *Water*, p. 236, *IO*). On the included maps, any hex labeled with "Depth" is a wider water hex (7 or more *BattleTech* hexes wide), and any hex labeled "River" is a narrower water hex (2 to 6 *BattleTech* hexes wide). In both cases, the number following the label is the depth of the water in levels.

SCENARIOS

The scenarios below present a single pivotal battle within each Clan Campaign on Tukayyid, adapted for *Strategic BattleForce* play. Each entry lists the maps, special rules and objectives for that scenario, as well as pre-created forces listed on the *Strategic BattleForce* rosters (see p. 30).

Formation Counts: Several scenarios use the number of Formations destroyed during play as an objective or tie-breaker. Clan 'Mech or mixed Formations each count as two Formations destroyed. All other Formations, such as Clan Infantry or Aerospace Formations, or any ComStar Formations, count as one Formation each for objective and tie-breaker purposes.

Building Scenarios: Players may wish to create their own *Strategic BattleForce* scenarios based on the Clan Campaigns in the *Battle of Tukayyid* campaign book, while fielding other combatants. The *Building Custom Rosters* section (see p. 26) has a list of standard Stars and Level IIs that can be used to quickly create rosters for other combatants.

DINJU PASS

Having won their landing site battle with the Fiftieth Division, Clan Smoke Jaguar gave the Jaguar Grenadiers the honor of leading the way through Dinju Pass, the clearest route to their objective, the mining city of Dinju Heights. But the pass was an ambush prepared by ComStar; the 299th Division lay waiting in hidden positions on either side of the pass, ready to destroy the Jaguars as they passed below them.

GAME SETUP

Use the Dinju Pass *Strategic BattleForce* map.

ATTACKER

The attacker consists of Clan Smoke Jaguar's Alpha Galaxy, Jaguar Grenadiers (pp. 51-53).

Zeta III, Epsilon-Zeta IIs

Deployment

The 299th Division is held off-map as Hidden Formations (see below). The southern edge of the mapsheet, within 3 hexes of the road hex, is the Defender's home edge.

OBJECTIVES

Attacker: The Attacker must exit at least 50% of their Formations off the Defender's home edge.

Defender: The Defender must destroy at least 50% of the Attacker's Formations.

VICTORY CONDITIONS

The scenario ends after the End Phase of Turn 12. If the Attacker has not completed their objective by the end of turn 12, the Defender wins the scenario.

SPECIAL RULES

The following special rules apply to this scenario.

HIDDEN FORMATIONS

The 299th Division is placed as Hidden Formations (see p. 284, *IO*). On the Force Sheet for the 299th Division, next to each Unit (pair of Level IIs) note the hex in which the Unit is Hidden.

All Defender Formations must be placed in the eastern half of the map. Only two Formations may be placed within one hex of the road. All other Formations must be more than one hex away from the road.

KOZICE VALLEY

The Diamond Sharks finally secured their landing zone, and the 222nd Assault Cluster led the way into the Kozice Valley. Following the river, the Diamond Sharks hoped to quickly gain the roads crossing the valley that led to each of their objectives. First, they had to navigate the gorges of the northern Kozice.

As the Diamond Sharks became bogged down in the valley, ComStar attempted quick strikes to cut the enemy's supply lines.

GAME SETUP

Use the Kozice Valley *Strategic BattleForce* map.

ATTACKER

The Attacker consists of Clan Diamond Shark's Gamma Galaxy, 222nd Assault Cluster (pp. 53-54).

Deployment

The Attacker Formations are placed first and may be placed anywhere on the Level 3 terrain in the northeast quarter of the map, north and east of the rivers. The Attacker's home edge is the northern edge of the mapsheet, within 12 hexes of the northeast corner.

DEFENDER

The Defender consists of ComStar's Eighth Army, Eighty-fifth Division (pp. 36-38).

Deployment

The Defender's Formations are placed last and may be placed anywhere within 6 hexes of their home edge. Two Formations may be placed within 12 hexes of their home edge, but these Formations must be west of the river. The Defender's home edge is the southern edge of the mapsheet.

OBJECTIVES

Attacker: The Attacker must destroy the enemy on their way to taking the southern roads.

Defender: The Defender places two objective counters adjacent to each other in the Attacker's deployment area (the Level 3 terrain in the northeast quarter of the map, north and east of the rivers). These are supply depots for the Diamond Sharks. If one or more of the Defender's Units occupies the same hex as an objective counter at the end of a turn, flip the counter over. If one or more of the Attacker's Units occupies the same hex as a flipped objective counter at the end of a turn, flip the counter back over to its original side.

VICTORY CONDITIONS

If the Diamond Sharks destroy at least 33% of the Defender's Formations and have at least four Formations on road hexes following the End Phase of any turn, the Attacker wins.

If both objective counters are flipped to the Defender's control as described above, following the End Phase of any turn up to the end of Turn 10, the Defender wins.

If neither of the above conditions are met, the scenario ends after the End Phase of Turn 12, and the side that has destroyed the most enemy Formations is the victor.

HOLTH FOREST

ComStar set fire to the Holth Forest in an attempt to drive back the Ghost Bears. The Seventh Bear Guards refused to fall back and instead engaged the Com Guards within the raging fires.

GAME SETUP

Use Holth Forest *Strategic BattleForce* map.

ATTACKER

The attacker consists of Clan Ghost Bear's Beta Galaxy, Seventh Bear Guards (pp. 55-56).

Deployment

The Defender places their units within 12 hexes of the eastern edge of the mapsheet. The Defender's home edge is the eastern edge and any part of the northern and southern edges of the mapsheet within two hexes of the coastal highway.

OBJECTIVES

Attacker and Defender: Destroy or force to withdraw at least 50% of the enemy Formations (see *Forced Withdrawal*, p. 242, *IO*).

VICTORY CONDITIONS

If the objective above is met following the End Phase of any turn, the scenario ends. If not, the scenario ends following the End Phase of Turn 12, and the side that has destroyed the most enemy Formations is the victor.

SPECIAL RULES

The following special rules apply to this scenario.

FIRE

At the start of play, fires are present in the hexes marked on the map. Beginning with the Initiative Phase of Turn 2, the fires spread 1 hex to the west.

Formations moving through fire hexes pay 1 additional Move. Attacks into or through fire hexes are obscured by Smoke. 'Mech Units occupying fire hexes are reduced to half their damage values (round up) for all attacks due to the additional heat they sustain from the fire. Non-'Mech Units in fire hexes or moving through fire hexes take 1 damage per turn.

DEVIL'S BATH

Clan Steel Viper entered the Devil's Bath, the mud and stone towers providing a multitude of hiding places for the forces of ComStar's Sixth Division. The Vipers could not leave a large ComStar force between their objectives and their supply lines, so they attempted to clear the Devil's Bath of the stubborn Sixth.

GAME SETUP

Use Devil's Bath *Strategic BattleForce* map.

ATTACKER

The attacker consists of Clan Steel Viper's Alpha Galaxy, First Viper Guards (pp. 59-60).

First Viper Guards

Command Nova

Deployment

The First Viper Guards are placed first, anywhere within 3 hexes of the southern edge of the mapsheet. The Attacker's home edge is the southern edge.

DEFENDER

The Defender consists of ComStar's Sixth Army, Sixth Division (pp. 30-32).

Deployment

The Sixth Division Formations may be placed anywhere on the mapsheet farther than 6 hexes away from the southern edge. Up to half the Defender's Formations may be placed as Hidden Formations. The Defender's home edge is the northern edge.

OBJECTIVES

Attacker and Defender: Destroy or force to withdraw at least 50% of the enemy Formations (see *Forced Withdrawal*, p. 242, *IO*).

VICTORY CONDITIONS

If the objective above is met following the End Phase of any turn, the scenario ends. If not, the scenario ends following the End Phase of Turn 12, and the side that has destroyed the most enemy Formations is the victor.

SPECIAL RULES

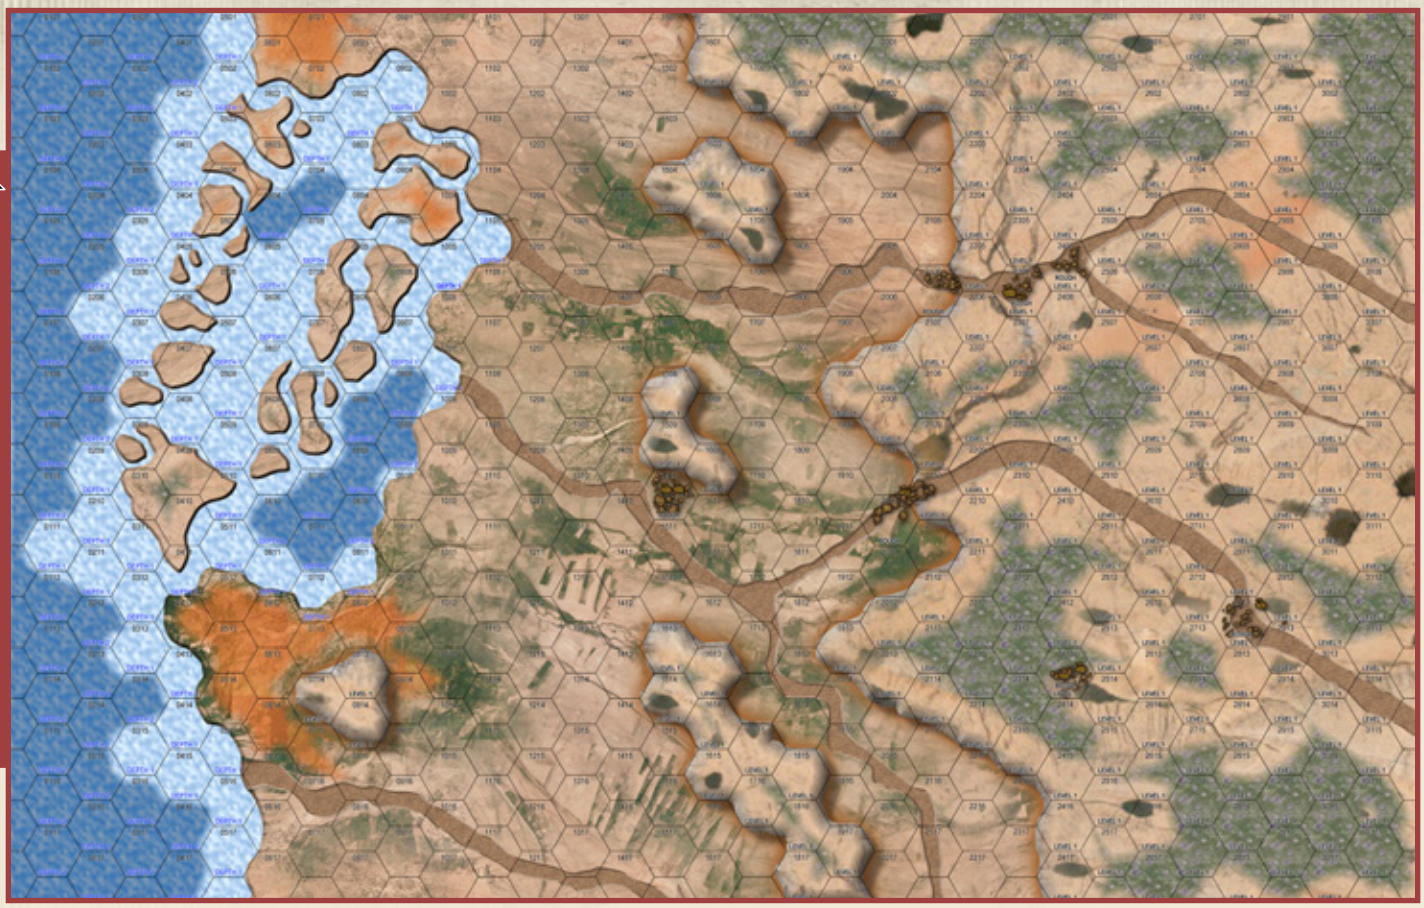
The following special rules apply to this scenario.

HIDDEN UNITS

Up to half of the Sixth Division may be placed as Hidden Formations (see p. 284, *IO*). On the Force Sheet for the 299th Division, next to each Unit (pair of Level IIs) note the hex in which the Unit is Hidden.

MUD AND GEYSERS

Formations moving through mud hexes pay 1 additional Move, and the hex also has a chance of containing an erupting Geyser. After all units have completed movement, the Defender may select one mud hex which may contain an erupting geyser. The Defender rolls 1d6; on a result of 4 or higher, the geyser in that hex has erupted, dealing 1 damage to all Formations in that hex. Additionally, add a +1 target number modifier to all attacks by or targeting Formations in that hex.



LAKE LOSIIJE

The Tukayyid campaign took far longer than the Nova Cats planned; their *touman* ran low on supplies, and they faced the imminent prospect of retreat. To reverse the trend, Clan Nova Cat needed more supplies.

ComStar had placed a hidden supply depot next to Lake Losiije. Clan Nova Cat secretly maneuvered the Forty-fourth Nova Cat Cavaliers under the lake, and as ComStar's 224th Division returned for resupply, they struck.

GAME SETUP

Use Lake Losiije *Strategic BattleForce* map.

Deployment

The Attacker places their units within 2 hexes of the edge of the lake, in water hexes. The northern edge of the mapsheet is the Attacker's home edge. The Attacker's Formations are not placed until after all of the Defender's Formations have been deployed.

DEFENDER

The Defender consists of ComStar's Seventh Army, 244th Division (pp. 39-41).

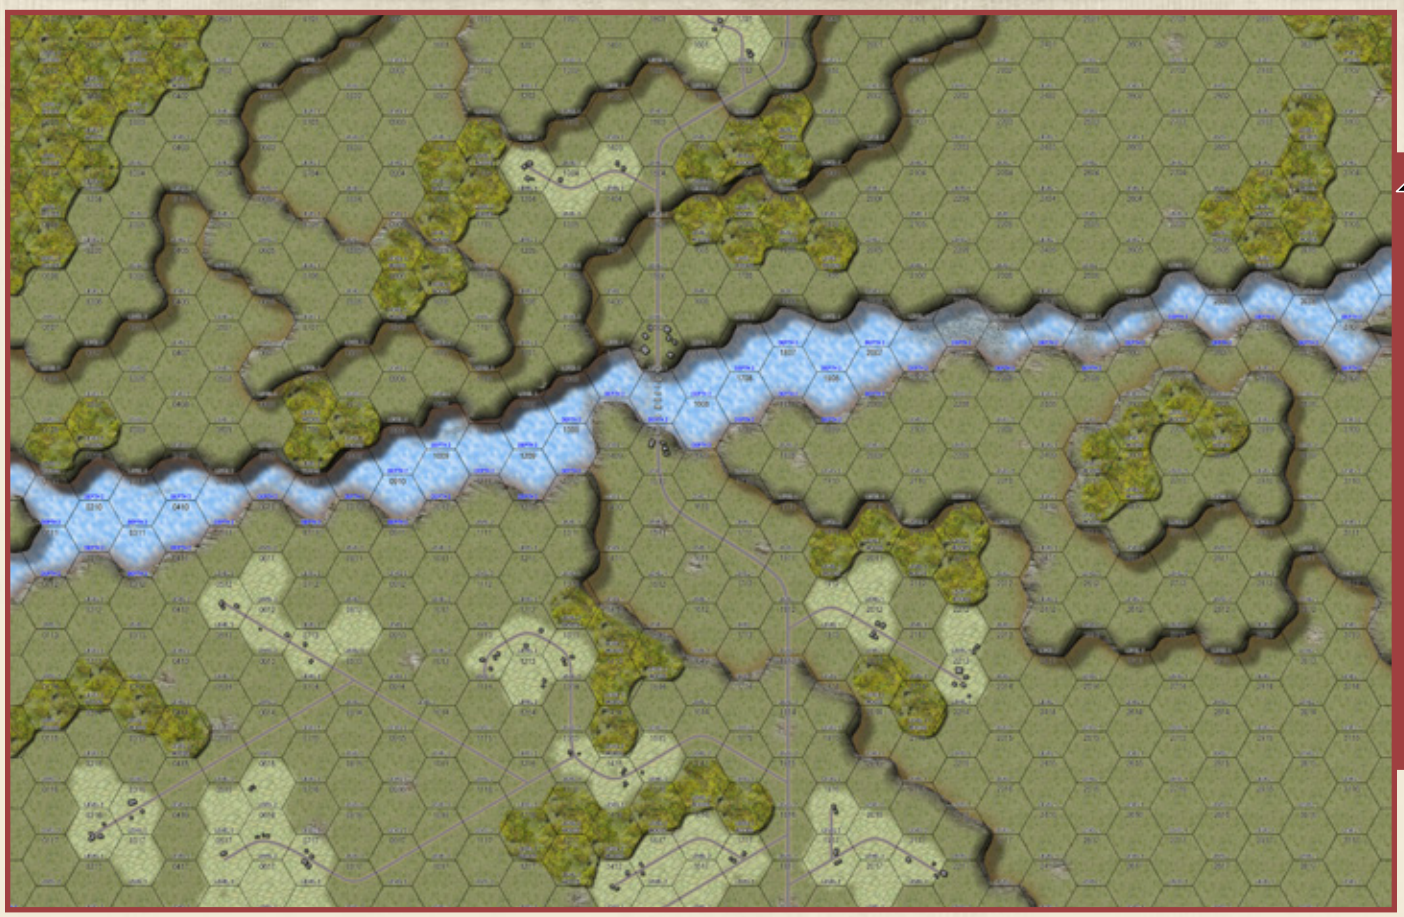
Epsilon III, Gamma-Delta IIs
Epsilon III, Epsilon-Zeta IIs
Zeta III, Alpha-Beta IIs
Zeta III, Gamma-Delta IIs
Zeta III, Epsilon-Zeta IIs



Deployment

Place two objective counters on the map as supply depots. Each counter must be placed within 10 hexes of a lake hex and in the southern half of the mapsheet. The ComStar player must place half of their units within 5 hexes of a supply depot hex. The remaining units must be placed at least 10 hexes from any supply depot hex and in the northern half of the mapsheet. The southern edge is the Defender's home edge.

OBJECTIVES

Attacker and Defender: If one or more of the Attacker's Units occupies a supply depot hex following the End Phase of any turn, flip the counter. If one or more of the Defender's Units occupies a supply depot hex with a flipped counter following the End Phase of any turn, flip the counter back to its original side.

VICTORY CONDITIONS

If both supply depot counters are flipped to the Attacker's control as described above, following the End Phase of any turn up to the end of Turn 10, the Attacker wins. Otherwise, the Defender wins.

SPECIAL RULES

The following special rules apply to this scenario.

AMBUSH

The Attacker automatically wins Initiative on the first two turns. The Defender has a +2 target number modifier to all attacks during Turn 1.

ROBYN'S CROSSING

Having landed in the relative safety of the southern Prezno Plain, the Jade Falcons had to find a way to cross the raging Prezno River at Robyn's Crossing, a massive bridge over the Prezno leading north toward Olalla.But ComStar rigged the bridge with explosives, destroying the Twelfth Falcon Regulars as they fought their way across. The Jade Falcons struggled to build a replacement as ComStar's 388th Division fired on any engineers that made their way to the crossing. The Falcons had to clear the other bank so their engineers could do their work.

GAME SETUP

Use Prezno River *Strategic BattleForce* map.

ATTACKER

The attacker consists of Clan Jade Falcon's Jade Falcon Galaxy, Falcon Guards (pp. 61-62).

Deployment

The 388th Division's Formations must be placed north of the Prezno River. The 388th's Aero Level III is providing air cover against Falcon aerospace fighters and is not used in this scenario. The Defender's home edge is the northern edge of the mapsheet.

OBJECTIVES

The Jade Falcons must clear the north bank near the crossing long enough for engineers to build a bridge (see *Engineers*, below).

VICTORY CONDITIONS

If the condition above is met following the End Phase of any turn, the scenario ends. If not, the scenario ends following the End Phase of Turn 12 and the Defender wins.

SPECIAL RULES

The following special rules apply to this scenario.

'MECH CROSSING

The Prezno River water hexes are initially uncrossable. The Attacker may create a 'Mech Crossing by sacrificing a Star as follows:

If one of the Attacker's Formation ends its Movement adjacent to a water hex, and that water hex is adjacent to ground hexes on each side, the Attacker may roll a die to determine if this water hex is suitable for a crossing. Roll 2d6; on a result of 8 or higher the Attacker may destroy a BattleMech (BM) Star from that Formation. This turns that water hex into a 'Mech Crossing.

Only Formations with at least 1 Jump may cross at a 'Mech Crossing. Moving into or out of the 'Mech Crossing hex requires the Formation's full movement for that turn, and only one Formation can be occupy the 'Mech Crossing hex at any time.

PREZNO RIVER

Other than the 'Mech Crossing hex, the Prezno River cannot be crossed. Formations can enter the river hex but may not move into a hex on the other side of the river. Formations can attack enemy Formations in the same hex, but cannot engage (see *Determine Range*, p. 239, *IO*).

ENGINEERS

If there are no ComStar Formations within 2 hexes of the 'Mech Crossing hex after the End Phase of any turn, the Attacker receives one Engineer counter. If there is a ComStar Formation within 1 hex of the crossing, the Attacker loses one Engineer counter (if they have any). If the Attacker holds four Engineer counters, the bridge is completed and the Attacker wins.

BLOODY BASIN PASS

The encirclement of Skupo forced ComStar to quickly withdraw from the city, as Clan Wolf rushed to keep the Com Guards on their back foot. ComStar attempted to hold the Bloody Basin Pass long enough to build a more lasting defensive line, while the Thirteenth Wolf Guards were sent to overrun it.

GAME SETUP

Use Bloody Basin Pass *Strategic BattleForce* map.

ATTACKER

The attacker consists of Clan Wolf's Alpha Galaxy, Thirteenth Wolf Guards (pp. 63-64).

Thirteenth Wolf Guards

Deployment

The Attacker's Formations are placed within 5 hexes of the western edge of the mapsheet, after all of the Defender's Formations have been placed. The Attacker's home edge is the western edge.

DEFENDER

The attacker consists of ComStar's Ninth Army, 366th Division (pp. 45-47).

366th Division

Deployment

The Defender's Formations are placed first, anywhere in the eastern half of the map. The Defender's home edge is the eastern edge.

OBJECTIVES

Attacker and Defender: Destroy or force to withdraw at least 50% of the enemy Formations (see *Forced Withdrawal*, p. 242, *IO*).

VICTORY CONDITIONS

If the condition above is met following the End Phase of any turn, the scenario ends. If not, the scenario ends following the End Phase of Turn 12, and the side that has destroyed the most enemy Formations is the victor.

BUILDING CUSTOM ROSTERS

The following list of Stars and Level IIs can be used to create custom forces for *Strategic BattleForce* battles.

COMSTAR

To build a ComStar Division, also known as a Level IV, pairs of Level IIs must be collected into *Strategic BattleForce* Formations (IIIa, IIIb, IIIc). ComStar does not actually use this organizational scheme, but it is used here to meet the *Strategic BattleForce* standards for a Formation size and how many Units can deploy in an area. Three of these ComStar *Strategic BattleForce* Formations (IIIa, IIIb, IIIc) together make up a single Level III. Six of those Level IIIs make up a Division.

- Each ComStar Division has a varying number of Infantry, Tank, and BattleMech Formations, as well as a set amount of Aerospace Formations.
- A Division consists of 6 Aerospace Level IIs and 30 other Level IIs as determined by consulting the Unit Composition by Designation Table (see p. 25, *BOT*) and identifying the Division's designator.

Once a ComStar player has selected their Level IIs, they may assign up to two Level IIs to a single *Strategic BattleForce* Formation. The *Strategic BattleForce* Formation shares a single unit type and movement. If all Level IIs in the *Strategic BattleForce* Formation are of the same type, then the *Strategic BattleForce* Formation shares that type. Otherwise, the Formation type is Mixed (MX). The Formation's Movement value is the average Move of the component Level IIs. The Movement type is the most restrictive (see p. 326, *IO*).

EXAMPLE

Frank decides to field a force from the Ninth Division of the Seventh Army that fought against Clan Nova Cat. From the Nova Cat Campaign (see p. 103, *Battle of Tukayyid*), he sees that the Ninth Division has a force composition of Mu. Looking at the Unit Composition by Designation table, Frank sees that he will have 16 BattleMech, 5 Tank, and 9 Infantry Level IIs to choose from.

CLANS

To build a Clan Cluster, sets of 2 or more Stars must be collected into *Strategic BattleForce* Formations, usually Trinaries, but Binaries, Supernovas and individually attached Stars are possible as well. These rules assume that a Trinary is the default *Strategic BattleForce* Formation, but they apply equally to Binaries, Supernovas and individually attached Stars. Three to six of these Trinaries make up a Cluster.

The force composition of each Cluster indicates what unit types and Formation sizes are used by that Cluster.

Supernovas are generally split in to two separate *Strategic BattleForce* Formations, the 'Mech Trinary and the Battle Armor Trinary, as this separation allows the Battle Armor Trinary to dismount and move separately. A player may choose to split the Supernova instead into two or three Novas (one 'Mech Star and one Battle Armor Star in a single *Strategic BattleForce* Formation).

The *Strategic BattleForce* Formation shares a single unit type and movement. If all Stars in the *Strategic BattleForce* Formation are of the same type, then the *Strategic BattleForce* Formation shares that type. Otherwise the unit type is Mixed (MX). The Formation's Movement value is the average Move of the component Stars. The Movement type is the most restrictive (see p. 326, *IO*).

EXAMPLE

The force composition of the 489th Assault Cluster of Clan Nova Cat (see p. 104, *Battle of Tukayyid*) is listed as a Heavy 'Mech Trinary, 2 Assault Mixed Trinaries, a Battle Armor Binary, and an Aerospace Binary. The weight listed for a Trinary is the average weight (rounding normally) of the Stars that make up that Trinary. For instance, a Heavy 'Mech Trinary could consist of one Assault Star, one Heavy Star and one Medium Star (weights of 4, 3, and 2 averages out to 3), three Heavy Stars, or an Assault Star and 2 Heavy Stars. It cannot consist of two Assault Stars and a Heavy Star, as that would average to Assault weight.
