## INTRODUCTION

Welcome to the Armor Pack supplement! This package contains scenarios, game statistics and counters designed specifically for use with the Heavy Gear tactical combat game. The following text explains the content in detail and gives advice and suggestions on how to use this package. Your copy of the Armor Pack should contain six 8.5x11" full-color counter sheets and a 16-page black and white booklet. The booklets contains four tactical scenarios designed around armored vehicles, which are followed by the game statistics of forty-four Terranovan combat vehicles.

The maps used by the scenarios in this pack can be found in the Tactical Combat Boxed Set (DP9-043). They are generic maps that can be freely combined to create new environments suitable for any scenario you might want to design. This also means that home-made or alternative maps can be easily substituted if the Tac Box is not available. Ideally, the maps should be covered or laminated with clear plastic so that water-soluble pens or grease pencils can be used to record information directly on them without permanent damage.

## DATA SHEETS - 1.1

The vehicle data sheets make up the bulk of this booklet. They contain the game statistics of forty-four vehicles and striders, presented in the same game-friendly condensed format that was first introduced in the Tactical Combat Boxed Set and the later Tactical Pack series.

Each sheet takes little space and includes only the statistics that are directly relevant to combat (for example, the Deployment Range is omitted). There is space reserved on the left hand side of the sheet to mark down the Attributes and Skills of the crew. The "Notes" column on the right side is very useful to mark down battle damage in a condensed format (for example, "-1 Sen." or "Sens. Dest.").

Once photocopied, the sheets provide a helpful and quick reference without having to comb through the sourcebooks all the time. For the players' convenience, a blank version of the vehicle sheet is included in the booklet on page 16.

## COUNTERS - 1.2

The counters included in this package represent the basic types of striders and armored vehicles used by Terranovan forces, as shown in the Vehicle Compendium sourcebooks and other Heavy Gear resources. There are more Aller and Visigoth Main Battle Tanks counters to allow Players to field massive armor assault waves.

A colored data tab along one edge of the counter indicates the affiliation of the vehicle (blue for North, red for South); the symbols are basic data that is useful during game play. The shield denotes the basic Armor value, the arrow with the rounded corners is the Ground Speed (some striders may have two of these — one for their Walking speed, one for their Ground speed), the circle is the number of crew aboard (if absent, the vehicle has two crewmen — the striders, having two movement systems, do not have room for that marker) and the cog contains an identification letter, to tell the various vehicles apart.

The counters should be carefully cut out of the sheet along the hairlines. Use a sharp pair of scissors and be careful not to cut the data tabs off. The counters should be inserted in a standard counter holder. These are found in the Tactical Combat Boxed Set or are available directly from Dream Pod 9 (product #DP99030, Tactical Accessory pack). The strider counters have the same orientation as the Gear counters: they must face an hex side. The vehicle counters are shown in profile: their front edge should be perpendicular to the front of the hex.

## 2.1 - SCENARIO 1: THE STRAY

Sous-lieutenant Walland couldn't believe his luck. A single Northern Aller main battle tank was grinding its way through the dense undergrowth of the oasis. Walland double checked his sensors for supporting units, but all his screens only displayed one large blip. "Must've gotten separated from his buddies during the skirmish." He switched on his comm system. "Riggs. Get your bully boys over to the north-western edge of the oasis. We've got a stray..."

### Mission Conditions

|                      |                                             |
|----------------------|---------------------------------------------|
| Weather:             | Clear                                       |
| Time of Day:         | Day                                         |
| Base Terrain:        | Rough becomes Woodland, Clear becomes Rough |
| Northern Forces:     | NT-3 Aller Main Battle Tank 1 x Lvl 3       |
| Southern Forces:     | Naga 2 x Lvl 2, Command Naga 1 x Lvl 2      |
| Northern Objectives: | Get the Aller off the board                 |
| Southern Objectives: | Destroy or capture the Northern vehicle     |

### Specific Scenario Conditions

As the Interpolar War progressed, it quickly degenerated into many smaller skirmishes in many regions. In this particular scenario, a Northern tank, which was separated from the rest of its unit due to faulty comm gear, is trying to return to its base of operations. The Southern forces must take it out before it can reach the safety of the perimeter currently controlled by the Northern Guard (right edge of the map). The tank begins on the left edge of the board while the pursuers start anywhere on the rightmost map.

### Victory Conditions

| North Victory Conditions                    | Victory Points |
|---------------------------------------------|----------------|
| Getting the Aller off the edge of the board | 4              |
| For every enemy unit destroyed              | +1             |
| South Victory Conditions                    | Victory Points |
| Destruction of the Aller                    | 5              |
| For every friendly unit destroyed           | -1             |

## SCENARIO 2: TURNCOAT - 2.2

"The treasonous dogs have holed up in the hamlet of Roussillons," Lieutenant Ephriam barked over the comm lines. "We have them now. I want Bravo 1 to flank the dogs from the left, and Bravo 2 to go in from the right. Let's go! Move it!" The Huns rumbled forward toward the tiny village. The rebellious MILICIAmen had to be brought back into line, for the sake of the war effort.

### □ Mission Conditions

|                      |                                                            |
|----------------------|------------------------------------------------------------|
| Weather:             | Sandstorm (+1 Obscurement)                                 |
| Time of Day:         | Day                                                        |
| Base Terrain:        | Woodland becomes Rough                                     |
| Attacker Forces:     | Hun Light Tanks 2 x Lvl 2                                  |
| Defender Forces:     | Hittites 1 x Lvl 2, Balista 1 x Lvl 2, Ostrogoth 1 x Lvl 2 |
| Attacker Objectives: | Destroy or capture the rebellious forces                   |
| Defender Objectives: | Escape; if possible slow down or eliminate pursuers        |

### Specific Scenario Conditions ◆

Many conscripted MILICIA troopers assigned to far-off posts used the opportunity to desert, making their way to freedom. Unfortunately for this group, a Republican cadre was nearby and have pursued them to a small Badlands hamlet. The village is three hexes of buildings somewhere on the rightmost map (treat as Urban hexes for game purposes, each capable of taking 30 points of damage). The goal of the attacking Republican unit is to destroy or capture the defending units and occupy the three buildings complexes (i.e. be the only troops in the three Urban hexes). The defender must prevent this or, failing that, escape.

### □ Victory Conditions

| Attacker Victory Conditions                                          | Victory Points |
|----------------------------------------------------------------------|----------------|
| Destruction of the entire rebel forces or control of the Urban hexes | 5              |
| For every enemy unit incapacitated (no Movement)                     | +1             |
| Defender Victory Conditions                                          | Victory Points |
| Getting at least one of the units off the edge of the board          | 1              |
| For every enemy unit destroyed or incapacitated (no Movement)        | +2             |

## 2.3 - SCENARIO 3: RUSH THE MAMMOTH

The fortunes of war sometimes make for strange bedfellows. In this case, a Mammoth strider found itself trapped in the Badlands when its combat transport was disabled. It was met by a group of ragged Northern Guard infantrymen who are currently moving away from a stronger Southern force. With "Big Brother" on their side, though, they have a fighting chance.

### Mission Conditions ☐

|                      |                                                                            |
|----------------------|----------------------------------------------------------------------------|
| Weather:             | Dawn                                                                       |
| Time of Day:         | Day                                                                        |
| Base Terrain:        | Rough becomes Woodland                                                     |
| Northern Forces:     | Mammoth 1 x Lvl 2, Badger APC 1 x Lvl 2, basic infantry squads 2 x Lvl 2   |
| Southern Forces:     | Hun 2 x Lvl 2, Crocodile AFV 2 x Lvl 2, basic infantry escouades 2 x Lvl 2 |
| Northern Objectives: | Hold until reinforcements arrive                                           |
| Southern Objectives: | Destroy or capture the Mammoth                                             |

### ◆ Specific Scenario Conditions

During the retreat, the Northern forces have moved into a ravine and assumed defensive positions. The goal of the Southern troops is to destroy the Mammoth and the infantry before any reinforcement can show up. Reinforcements for the North arrive on turn 12, provided that at least half of the infantry squads are still alive; this ends the battle, since they vastly overpower the Southerners. All sides of the playing area are ragged Level 3 cliffs. The Mammoth starts three hexes from the leftmost edge of the map. The infantry and their transport can be placed anywhere. The Southern forces enter within three hexes of the rightmost side.

### Victory Conditions ☐

|                                |                |
|--------------------------------|----------------|
| North Victory Conditions       | Victory Points |
| Holding until Turn 12          | 3              |
| For every enemy unit destroyed | +2             |
| South Victory Conditions       | Victory Points |
| Destruction of the Mammoth     | 5              |
| For every enemy unit destroyed | +1             |

## SCENARIO 4: A MATTER OF HONOR - 2.4

"Reconnaissance report coming in, Captain" Lieutenant Lincon reported. "Looks like cavalry from the 12th, sir." The fabled 12th — the ones who claimed to never have lost a battle. Well, there's a first time for everything, Captain Reinhold mused. "Saddle up, men. We've got to teach those snakes a little something about defeat!"

### □ Mission Conditions

|                      |                                              |
|----------------------|----------------------------------------------|
| Weather:             | Dusk                                         |
| Time of Day:         | Day                                          |
| Base Terrain:        | Rough becomes Clear                          |
| Northern Forces:     | Aller MBT 1 x Lvl 2, Klemm LBT 2 x Lvl 2     |
| Southern Forces:     | Visigoth MBT 1 x Lvl 2, Hun LBT 2 x Lvl 2    |
| Northern Objectives: | Destroy or capture the enemy                 |
| Southern Objectives: | Destroy the enemy without losing any vehicle |

### ◆ Specific Scenario Conditions

An advanced formation of the MILICIA's 12th cavalry regiment, expecting an easy victory, suddenly find themselves in the fight of their lives. They have the honor of having never been on the losing side of a fight; defeat would be a great dishonor and a terrible loss of morale. The local Guard command will not pass up such a good opportunity to destroy the fighting spirit of their opponents. The Southern units enter the board on the southern edge, while the Northern forces enter on the north-east end (see map below).

### □ Victory Conditions

|                                                  |                |
|--------------------------------------------------|----------------|
| North Victory Conditions                         | Victory Points |
| For every enemy unit destroyed                   | +2             |
| For every enemy unit incapacitated (no Movement) | +1             |
| South Victory Conditions                         | Victory Points |
| For every enemy unit destroyed                   | +3             |
| For every friendly unit destroyed                | -1             |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 4/7      | Name | Fire Arc | S | M  | L  | EX | Acc. | Dam. | ROF |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 23/46/69 |      |          |   |    |    |    |      | x    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |          |      |          |    |     |     |     |      |      |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Weapons: |      |          |    |     |     |     |      |      |     | Unit                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 0/0      | Name | Fire Arc | S  | M   | L   | EX  | Acc. | Dam. | ROF |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 6/11     |      |          |    |     |     |     |      | x    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 0/0      | Name | Fire Arc | S | M  | L  | EX | Acc. | Dam. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 5/10     | HMG  | T        | 1 | 2  | 4  | 8  | -1   | x3   |
