Yet Another Word from Our Founder

Ladies, Gentlemen, and Other Beings,

Welcome to the greatest shop in the multiverse.

Winter, as they say, is coming, and so it is time for us here at Aurora's to launch our Winter collection. Many of these were inspired from a recent trip to the cold lands of Icewind Dale. I was on a trading mission, and one evening I was sitting outside a small cave, sheltering there from the fierce winds, and it struck me that, with enough preparation, even this arduous journey and inhospitable place could be made tolerant, if not pleasant. So there, sheltering near the campfire in the near-eternal darkness of the cold nights, I communicated with my contacts throughout the Realms and the seeds were sown for the book that you now hold in your hands.

In this very catalogue, we aim to provide you with the most comfortable experience that coin can buy, for those long winter nights, or treks into the cold and icy wilderness.

Many items are designed to make survival easier, though never a routine matter, while others provide the comforts of home in the situations where it might otherwise be impossible. And so, within these pages, stretching from the coldest expanses of Sorrim in the north, past the jungles of Chult, and even the very Tears of Selûne in the sky, you'll find offerings that help make the cold nights easier.

All, of course, at a very reasonable price.

We welcome you to Aurora's Winter Catalogue!

See you this spring,
Aurora

Arms and Armor

We all know that protection is essential, whether it is against the brutally cold environment or the inhabitants of the frozen wilds. Dangers stretching from polar bears to fearsome white dragons prowl the frigid lands. As such, Aurora's is keen to offer the best protection you can find, all at reasonable prices.

Atlatl

Price 10 gp; **Weight** 2 lb.

The atlatl is used in the cold regions of the world, where bows and crossbow are rare. The atlatl is a foot-long piece of wood or bone that is held in one hand and placed along the forearm in a sort of ramp, which enables the user to throw javelins and spears far further than normal. When used, the atlatl doubles the normal and maximum range of the weapon. This comes at a cost though, as the atlatl must be reloaded between attacks.

Aurora's Note: During the winter, Aurora's stocks a different version of the atlatl, which is much cheaper. It is designed for snowballs and is often used by children and adults during leisure. This version costs only 1 cp.

Fire Knife

Price 20 gp; **Weight** 1 lb.

A fire knife is a variation of the normal dagger, coming in as many regional variations as the standard dagger, from the curved daggers of Calimshan to the straight no-nonsense blades of the Northlanders. It is crafted from standard iron, but it is superheated far beyond the strength of normal steel through the use of dragon fire.

Originally, these blades were created with the help of Velcuthimmorhar, the Red Dragon of Mirabar, also known as Hephaestus. After his disappearance, various other dragons (usually of the metallic varieties) have been employed to help craft these blades.

The blade has the same characteristics as a normal dagger, except it causes 1d4 fire damage, instead of 1d4 piercing damage.

Aurora's Note: There is some confusion in the historical records about Velcuthimmorhar and/or Hephaestus, as there is evidence to show that there were

two red dragons who bore that particular nickname. It is unclear if it is one or two different beings that the old texts refer to. What is known is that the dragon of Mirabar is no longer involved in the crafting of these blades on the behalf of Aurora's, but we cannot say whether either (or both) are still alive.

Ice Pick

Price 5 gp; **Weight** 2 lb.

An ice pick is a one-handed weapon designed for use while climbing slippery slopes or glaciers and is especially useful when attempting to cross ice floes, as it gives the wielder a purchase point that might not otherwise be available. In style, the ice pick resembles the war pick, but while the war pick has a large curved spike on one side of the head and a hammer on the other, an ice pick has 2 smaller curved spikes, but which are serrated for extra grip. This gives the user advantage on climbing checks when climbing slippery or icy walls, and it means that unlike the war pick, the ice pick can be thrown short distances.

Icicle Weapon

Price +25% of normal weapon;

Weight same as normal weapon

Icicle weapons, ironically, come from the South, as opposed to the cold North, and are especially popular in countries like Amn and Calimshan, countries that have a history of strong assassins guilds. An icicle weapon is crafted by master alchemists or wizards, made from enchanted ice. An icicle weapon performs in all respects like a normal steel weapon but is made from ice instead. When an icicle weapon performs a killing blow (reducing a creature to 0 hit points or below), the weapon begins to melt and, over the course of 3 rounds, the weapon turns into a small puddle of water, which eventually evaporates.

Aurora's Note: Icicle weapons are NOT legal in most countries, and as such are not available at all of our outlets. Where icicle weapons ARE available, they cost 25% more than normal weapons of their type.

Remorhaz Scale Hide

Price 200 gp; **Weight** 10 lb.

This hide armor is created from the strongest scales of the remorhaz, giving it incredible tensile strength in spite of being slightly lighter than normal hide armor, and also conveying that creature's ability to ignore fire and cold. When wearing remorhaz scale hide, the wearer ignores the first point of cold or fire damage from any damage the wearer takes. In addition, the wearer is immune to the harmful effects of extreme temperatures. The wearer does not need to make a saving throw to prevent fatigue from extreme cold or heat unless the cold or heat is magical or the wearer is on an elemental plane.

Aurora's Note: It is worth noting that remorhazes are more intelligent than most animals, and they will attack anyone bearing this type of armor on sight, to the exclusion of all other targets. As such, we recommend that customers not don this armor in regions where remorhazes have been sighted.

Turncoat

Price 20 gp; **Weight** 12 lb.

The turncoat is a particular version of leather armor that comes with a built in cloak, along with the boiled leather chestplate normally used for protection. The armor has been dyed in the prevailing colors of one of the four seasons of the world, so that you're able to blend in better with the lands around you when hunting, all while providing protection against the dangers of the land.

Aurora's Note: The turncoat provides advantage to Dexterity (Stealth) checks, but only outdoors in an environment where the dyes applied to the cloak match the prevailing season, i.e. a turncoat dyed with winter colors would not provide advantage to Dexterity (Stealth) checks during spring, summer, or autumn. Subject to the DM's approval, this might apply in certain other situations, such as having a winter cloak that's used in an arctic environment, during spring.

Within each bag are a number of herbs and berries, along with spices, which are guaranteed to heat you up and refresh your spirit on those icy days and nights in the snow. Spider/Drider Silk Scarf

Price 5 gp; **Weight** 1 lb.

Created from spider silk, this scarf is made from incredible fine strands of silk, all knitted into a strong, 6 foot long, scarf. Usually died in vivid colors, it comes in any color that a customer could want, though it may take a day for the new dye to be applied (free of charge). The scarf is very warm to the touch, and is an excellent protection against the cold. It is also as strong as a silk rope, though it is obviously much shorter.

A rare version of this is made from the silk produced by driders. To all appearances it is the same as the normal spider silk scarf, until darkness falls, whereupon it emits a pale blue light that illuminates the nearby area, shedding dim light in a 5-foot radius. Please note that the drider silk scarf costs 20 gp.

Aurora's Note: While the drider version of this scarf is non-magical, to spells such as *detect magic* it does show as being magical, likely a residue from whatever magic transformed the drider in the first place. It does not show as being from any particular school of magic.

We deliver in bark, powder, and even candy form! We also include a recipe book for the best ways to bring out the unique flavor of fire bark.

Aurora's Note: Bear in mind that while fire bark can help in cold temperatures, you should use it wisely. A bite of bark will warm you for an hour. Too much can be hazardous to your health. Excess amounts of fire bark have been known to cause hallucinations. It is not recommended to take spoonfuls of fire bark powder at a time, especially if you have respiratory problems. Do not take excessive amounts of fire bark under any circumstances. Consult your cleric or other health care provider to see if fire

bark is right for you.

Alchemical meltwater is a must on arctic expeditions or on frigid sea trips!

Aurora's Note: Keep out of reach of children and pets, and keep your meltwater in sealed containers when you are not

using it. Alchemical meltwater is extremely poisonous when not diluted into water, and can sometimes develop a sweet scent over time.

Everwarm Stone

Price 10 gp; **Weight** 5 lb.

An everwarm stone comes from a particularly active volcano within the Peaks of Flame in the jungles of Chult. It has been mined by azers and transported to locations throughout Faerûn. An everwarm stone is a 5-pound slab of rock, eerily reminiscent of a tombstone, that emits heat into the nearby surroundings. Anyone within 10 feet of the stone can feel the heat of it when it is removed from its special leather carrying-case, being warmed as if close to a roaring hearth. The heat is not strong enough to cause any burns or cause anything to catch fire, and while it cannot be used for cooking, as it doesn't get

warm enough, it could be used for thawing out frozen food or helping someone recover from hypothermia.

Falsetrack Snow Boots

Price 30 gp; **Weight** 8 lb.

The snow is a giveaway to those who tread on it. It makes a tracker's job easy, and a sneaker's job hard. But we have a solution for those of you who wish to surreptitiously sneak on snow! The falsetrack snow boots may not hide your destination, but it can mask your pedal identity. We have a wide variety of track masks that will fool pursuers and trick your friends. Want to convince your party that a bear has walked through camp! We've got you covered! Want to look like a bounding rabbit? We're on it! We have wolf, doe, child/halfling, and cloven. Let us provide you with the means to move unbothered across the soft fluffy expanse, and in style! Our falsetrack boots are comfortable, and double as actual snow shoes. Just remember not to slip, since an accidental snow angel will give the game away!

Aurora's Note: Each boot has an instruction booklet to teach you ideal steps and gaits to mimic the necessary creature. A skilled tracker will see through the normal human tread of a falsetrack boot, so remember to practice those silly walks!

Furlined Boots

Price 5 gp; **Weight** 5 lb.

Our furlined boots are made from the finest leather available and lined with the fur from the inner coat of native animals. Depending on the region, this might be deer, rabbit, bear, or something else entirely. Please refer to your local merchant for details. This ensures that the boots remain warm and dry throughout the cold and wet seasons. The boots extend to knee height to give maximum protection to your feet and calves, while retaining mobility. For those who wish, boots can be provided that extend to mid-thigh, but these are a special-order item that requires a week's notice and prepayment.

Aurora's Note: Furlined boots can be bought with exotic materials, such as white dragon scales, but these provide no further benefit to anyone traveling in a cold climate and will increase the cost dramatically, with the price rising by 500%, and requiring the materials to be provided. Please also note that we recommend picking up snowshoes if you're traveling into areas where heavy snow is expected, so as to ease your traveling. For this, we provide a 10% discount if you buy both a pair of furlined boots *and* snowshoes.

Ice Boots

Price 10 gp; **Weight** 6 lb.

Ice boots are ankle high boots, made from strong, sturdy leather, and usually lined with seal fur for waterproofing, extra heating, and comfort. This allows the wearer to keep their feet warm and dry in all kinds of weather. However, the main difference between our patented furlined boots and the ice boots are the special grips mounted underneath the boots. These consist of a set of metal ridges embedded within the thick leather sole of the boot, which allows the wearer to avoid losing their grip when on an icy surface.

Aurora's Note: Please note that Aurora's advises that you do not wear the ice boots when not in an icy environment, as the ridges underneath the soles can get extremely uncomfortable when not able to sink into the ground. Using them as a weapon *is* possible, and kicking someone has the same effect as a dagger.

Ice Climbing Gear

Price 5 gp; **Weight** 20 lb.

Ice Skates

Price 1 gp; **Weight** 5 lb.

No winter kit is complete without at least a pair of ice skates! These fitted shoes are lined with an iron blade or “skate” that lets you glide over ice. With enough

practice and balance, you can feel like the prince of the ice as you gracefully slide. Primarily used for sport or as a fun pastime, ice skating remains among the most popular activities among the cities to the north. Be in the loop, and skate for fun with our signature skates! For a limited time, we are offering a free engraving on the side of the skate blade for no additional cost!

Aurora’s Note: Please be

sure that you are skating safely. If you’ve ever wondered what is meant by the dangers of skating over thin ice, this is the origin of that particular idiom. Thin ice is a serious matter, and Aurora’ Whole Realms Emporium cannot be held liable for injury sustained while skating on unsafe surfaces.

Ice Hardener

Price 10 gp; **Weight** —

Ice hardener is a growing white and blue liquid contained within a crystal vial, which has a slight chill to the touch. When poured out onto snow or ice, it causes up to 20 pounds of the material to become as hard as tempered steel, though it can still melt if the temperature rises high enough. Created by the Sossrim, the ice hardener is then exported from Sossal to the rest of Faerûn.

Aurora's Note: Please note that it takes up to an hour for the ice hardener to take effect on the snow or ice and that it has to be applied evenly across the surface of the ice in order for it to work properly. Hardened ice is *not* steel, and will melt at the normal temperatures that the ice or snow would. In all other respects, it handles like steel. Rumor has it that Sossal has fortresses created entirely from hardened ice, created anew each year in new and spectacular shapes, but Aurora's has been unable to confirm or deny this rumor.

Polar Bedroll

Cost 2 gp; **Weight** 12 lb.

A normal bedroll will not protect you against the harsh cold of the North, especially in the frigid winters that plague the northern reaches of places like Icewind Dale, the Great Glacier, and

beyond. In these areas, even the hardest of people need an extra layer of protection while they sleep. To this end, we present you with this fur-insulated bedroll. The innermost layer is made from fine seal skins and furs, in order to preserve as much body heat as possible around the wearer, while at the same time keeping even strong winds or drafts from reaching you. This is then covered with a cotton layer, similar to a bedroll, to add some softness and cushioning when laying upon stony or icy ground. Finally, this is then covered with a strong canvas outer layer to protect the bedroll from wear and tear while traveling. Along with these heat preserving measures, we also added a hood onto the bedroll itself—done in the same manner. This hood has a small mesh window, so that when lying in the protective warmth of the polar bedroll, you'll still be able to see out, and keep on guard against approaching enemies.

Aurora's Note: Some customers have complained that the smell of the seal skins has attracted various predators in the arctic regions, such as polar bears. This is, of course, completely unsubstantiated.

Polar Tent

Price 5 gp (2 person), 20 gp (8 person); **Weight** 30 lb. (2 person), 60 lb. (8 person)

A polar tent is a tent that allows the inhabitants to rest comfortably in an insulated environment that keeps the heat within the tent at higher levels than would be possible for a normal tent. This is due to both the treatment that the canvas of the tent has received (a specially guarded formula involving an alchemical treatment and covering with whale fat), but the inside of the canvas itself has also been further insulated using particularly warm fur from the creatures of the region, most often that of rabbit or deer.

The tent comes in two sizes: one for 2 people and one for 8. The 8-man tent comes with a special, covered brazier, that allows for a campfire to be lit inside the tent itself, without the flames catching on the fur or the canvas, and a special opening in the top, that allows for any smoke to be released from within the tent.

Aurora's Note: Aurora's recommends that the fire is put out, or at least only has embers remaining, when any inhabitants of the 8-man tent go to sleep, so as to avoid any incidental damage to the tent or inhabitants,

as the brazier is still hot enough for anyone touching it to suffer burns.

Seal Fat

Price 3 cp; **Weight** 1/8 lb.

Seal fat is your winter wonder! This amazing material is so versatile that you'll run out of fat before you run out of uses! Whether powering an oil lamp, or protecting your skin from the uncaring elements, seal fat is your friend. An easily obtainable commodity in the north, seal fat is infinitely useful for those climates, as it is for the creature from which we harvest it.

Use our treated seal fat to protect your exposed skin from the elements, or to protect any sensitive gear from weathering effects. A tiny dab'll do! Our specially liquified seal oil is a great lamp oil, and even leaves a familiar aroma when burned.

Use our untreated seal fat to flavor your meal, or as an oil for frying and cooking. We have a great recipe sheet for your culinary needs!

Aurora's Note: This item is not available in warmer climates due to the higher rate of spoilage, but we can sell you a plant-based alternative for the same price! Make sure you ask for our "faux seal fat" tins, and specify if you want it seal scented as well!

Skis

Price 9 sp; **Weight** 6 lb.

Through the majestic peaks and valleys of many a snow-covered mountain, a pair of skis can be your best friends. Few other means of conveyance are as fun or fast as skis on a proper slope, and the mobility afforded by them has made them a favorite of snowbound nations. Some militaries even require their soldiers to train on them, but you can do it for fun! We offer lessons at an affordable price where available, so you won't be a snow bunny for long. Don't be left out next winter, strap on two planks and ski like a speed demon down the slopes with the best of them with our signature ski set. Each set includes two ski poles, and proper shoes for safe and easy skiing experiences. Snow goggles are recommended.

Snow Goggles

Price 1 sp; **Weight** 1/2 lb.

When traversing the vast snowy climes of the great north, the blinding reflection off of the snow can be damaging to

your eyes. We've got you covered! Through this simple but elegant solution, you too can trek across the frozen tundra with adequate eye protection. These wooden eye coverings have a thin opening that blocks out the majority of the bright snow shine, making tundra travel a breeze! Consider asking about our designer models, especially those made from whalebone. Our scrimshaw snow goggles are all the rage in Neverwinter. Keep your sight in a whiteout with our snow goggles!

Snowshoes

Price 1 gp; **Weight** 3 lb.

These do not resemble shoes or boots as they are recognized throughout Faerûn, but instead, these wooden frames are designed to be strapped onto a pair of boots, where they help spread the weight of the wearer across a larger surface. This prevents the wearer from sinking too deeply into the snow. Created from hardwoods harvested and collected near the Great Glacier, the wooden frames are strong, with thin strips of strong wire. The traditional footwear of the Ulutian tribes of the Great Glacier is strung with gut from polar bears and snowcats, but in more southern climates, this is normally from strengthened lengths of leather.

Aurora's Note: We recom-

mend buying these together with our special furlined boots, for added comfort and a 10% discount on both the snowshoes and the furlined boots.

Snilloc’s Instant Igloo

Price 50 gp; **Weight** 1 lb.

Potion, common

Have you ever wanted to spend time in an igloo? Do you like the idea of an ice house? You are not alone! With this amazing kit, you won’t be left out in the cold again! Just find approximately 500 pounds of snow or ice, dig an appropriate trench or rut in the assembled material, and slowly pour this potion over it, and it will form into an ice dome! One potion is enough to create an igloo with a 30-foot radius, or three igloos with a 10-foot radius each. The igloo lasts for a week in cold weather, or a day in warm weather. The shelter is sufficient

to protect against cold weather, and splendidly resilient (each 5-foot square has the following statistics: 20 hp, AC 13). You may be stuck in a snowstorm, or enjoying a leisurely trip on a glacier, but this handy potion will make a bad situation good, and a good situation better!

Aurora’s Note: The wizard Snilloc’s name is used with permission. The name and product identity of Snilloc’s Instant Igloo is protected where applicable. There are many imitators, but only one Snilloc. Snilloc’s Instant Igloo is not to be used in Hell, the Abyss, or the elemental plane of Fire under any circumstances.

Sundry

Whether you need general supplies, or a specific item like a holy symbol, we have you covered! Keep in mind that many of the items here are for cold weather, but may be more utilitarian than for one's survival or comfort. There is no end to the items we have in our sundries warehouses, but here are a handful of items that we would like to highlight as you prepare for winter, especially for all of you ice enthusiasts out there.

Crustacean Cage

Price 1 sp; **Weight** 5 lb.

Now you too can catch crustaceans with ease! With our signature crustacean cages, you will be trapping crustaceans like an expert, using the very same cages that our crustacean vessels use to provide you with delicious crustacean treats! We would sell you bait, but freshness counts when trapping crabs! We happily support local bait shops, and we support you! If you sell us your excess crustaceans, we will refund you the cost of the crab cage after you have sold us 10 pounds or more! We rely on small and local fishermen and crustacean trappers just as we do our large trapping vessels, and you too can start a modest living from this enterprise. Just talk to one of your local Aurora's Whole Realms Emporium representatives today!

Curling Equipment

Price 1 gp; **Weight** 25 lb.

Play the game that is "sweeping" the north! Curling, the popular game of sweeping and sliding can be for you too! Find a suitably cold and slippery surface, and you can use this kit to have all the fun and excitement of curling in your own backyard! It'll no doubt bring an audience as on-lookers seek out the thrilling joy of a well-thrown stone. We shape our stones and craft our brooms to the exact specifications of the most prominent curling leagues. If you are unhappy with your curling kit, we are happy to replace it with another game set of your choice, but we invite you to slide into this fun activity, as the trend of curling has yet to cool.

Ice Saw

Price 2 gp; **Weight** 3 lb.

Ice is tougher than it looks, and can be especially hard on equipment. Don't ruin your weapons and tools trying to make a dent in the ice! If you should find yourself in need of cutting ice down to size, whether for crafting an ice fishing hole, for the burgeoning ice trade, or other ice-related pursuits, our ice saw is the perfect thing! Crafted to last its share of winters, our ice saw can bore into ice and cut in straight lines for perfect shapes every time! The sawed edges are especially good for resisting wear and tear, and for cleaving ice one "bite" at a time. Just remember to take frequent breaks, and brace against slipping as appropriate.

Ice Sculpting Tools

Price 15 gp; **Weight** 10 lb.

An artist may be as good as his tools, and as fleeting as his medium. Consider being a great artist with these great ice sculpting tools, and make wonderful and ephemeral pieces of art out of impermanent ice. Although these tools are perfectly suited for commercial ice carving, we recommend them for any canny

artist that might have the talent. This wonderful set includes a finely crafted set of shaped chisels, a stone mallet, saws, brushes, and a slew of other tools of the trade. Be as a sculptor, and create the ephemeral phantasia of an ice statue that will delight and impress. Or create a whimsical pattern on an ice wall for others to see. The choice is yours! Our ice sculpting tools are of the finest quality, and will serve you well for many winters! They are especially made to handle cold weather conditions. Just ask professional sculptors, they swear by our tools!

Aurora's Note: Please note that our sculpting tools are meant for ice. They are not to be used on stone, even really cold stone. Use on ice elementals and other ice creatures is not advised.

Industrial Ice Tongs

Price 1 gp; **Weight** 3 lb.

Do you work in frigid climates, and with perishable items? Do you need to move large blocks of ice? Do you find yourself fumbling with slippery cubes

of frozen water? Buy an industrial ice tong! Made with the best techniques gleaned from the various ice harvesting companies throughout Icewind Dale, our steel ice tongs are perfect for all weather conditions, and can haul up to 400 pounds of ice!

These tongs are made for industrial use, and are perfect for any professional ice movers. If they ever break in the process of moving ice, we will replace the tongs free of charge.

Aurora's Note: Our tongs do not improve your carrying or lifting capacity. Please lift and carry ice responsibly. Aurora's Whole Realms Emporium is not responsible for any physical injury, long lasting or otherwise, incurred while using industrial ice tongs. Ice tongs are not meant for use on ice elementals, or other ice creatures, without their consent.

Portable Shrine

Price 300 gp; **Weight** 40 lb.

The portable shrine is the latest addition to our “clergy” line of equipment for the discerning customer. This is a portable altar that can be unfolded from a handy 2 by 2 foot crate-like position (making it ideal for moving around), into a fully-fledged shrine for the deity of your choice. Setting up the shrine takes 5 minutes, as it intricately unfolds and snaps into place.

Various compartments within the altar contain all the normal paraphernalia available to lower-ranking clergy members of that particular faith, such as various candles, stoles, altar cloths, cups, oils, incense and so on. It does *not* contain the paraphernalia of higher-ranking clergy (i.e. there are none of the items required for a ceremony by a high priest, for example — but specific items are available at the DM's discretion, though none should exceed 10 gp in value). It also serves as a holy symbol of that deity, once unfolded.

Aurora's Note: The church of the Merchant's Friend (or Waukeen, for those of a non-religious nature) sponsors this particular item very heavily in an effort to spread their faith further, and encourages merchants and traders to “bring the faith into areas

of business and commerce.” As such, a purchase of the portable shrine, if it is dedicated to Waukeen, receives a 25% discount, meaning that it only costs 225 gold pieces for a Waukeenar shrine.

Ritual Candle

Price 1 sp; **Weight** —

A ritual candle sheds bright light in a 10-foot radius and dim light for another 5 feet. Chemicals and minerals have been added to it, so that once per minute a flare of sparkles and light springs from it. This extends the bright light to a 20-foot radius and dim light for another 10 for a single round. A ritual candle lasts only for 10 minutes. Anyone touching the candle when it fires takes 1d4 points of fire damage, with the first flare happening 1 minute after the candle is first set alight.

For the 1 round where the light is flaring, it counts as a holy

symbol, provided there is a deity's mark placed upon it.

Aurora's Note: These candles have been used in religious ceremonies across the face of Toril for years. As such, you can choose to have the candle emblazoned with the symbol of the deity of your choice. Additionally, you can select the color of your choice for the sparkling effect. This increases the price of each ritual candle to 2 silver pieces.

Vampire Hunter's Kit

Price 70 gp; **Weight** 20 lb.

The vampire hunter's kit is especially constructed for the long nights of winter, where the predatory undead are most likely to be out and about, but it can be used at any time of the year. The kit comes in a small chest, approximately 1 foot by 1 foot, that is locked with a good quality lock, requiring a DC 20 Dexterity (Sleight of Hand) check to open without the key. The chest can contain up to 1 cubic foot or 30 pounds of gear.

Inside the chest, you'll find a few things: a warm cloak, for the long waits while you hunt this dangerous undead predator, a bullseye lantern with a door, so that the light can be shut off—to avoid revealing your position, a flask of oil for the lamp, a silver holy symbol of the deity of your choice, a flask of holy

water, 3 wooden stakes, and a strand of garlic.

Finally, and most importantly, is a small vial of an alchemical concoction known as life's bane, created by the clergy of Lathander the Morninglord. This is a poison specifically for use against the undead and is harmless to any other creature apart from undead. An undead creature subjected to this injury poison must make a DC 10 Constitution saving throw. On a failed save, it takes 6 (1d12) poison damage and is poisoned for 24 hours. On a successful save, the creature takes half as much damage and isn't poisoned. The poison ignores any poison resistances or immunities that undead creatures have. Life's bane is an extra option that can be bought for the vampire

hunter's kit, at 300 gold pieces per dose.

Aurora's Note: 10% of the cost of this purchase will be donated to a nearby temple or church of the deity who provided the holy symbol for *your* vampire hunter's kit. This does not include the cost of the holy symbol (which has been paid for separately) nor the cost of life's bane from the temples of Lathander. Aurora's does not guarantee the effectiveness of garlic against the undead. Also, buyers should note that this kit is different to the Vampire Slayer's Pack that you could find in our **Aurora's Whole Realms Autumn Catalogue**.

Icewind Chill

There is something magical about the chill of the ice, mixed with the unique and amazing vegetation that grows in icy lands. We can bring it to you, giving you a scent that is as refreshingly cold as it is pleasant.

Icewind chill is a scent that you would expect to find in the wilds around the eponymous Icewind Dale. The smell of salty ice and pine is something that you can only experience in these breathtaking wilds, and we have worked with people who were born and raised in those areas to recreate the scent to perfection. You too will be transported to the realms of ice, feeling the nip of wind and snow that are so unique to the northern parts of the Sword Coast.

Luskan Lumber

For those lucky few that have gone so far north as to see the splendour of Luskan, we bring you one of the most recognizable scents of that wonderful northern city! The scent of its lumber will evoke its marvelous markets, as well as the amazing furniture and firewood that comes directly from Luskan to many places near to it.

With a bit of real sawdust incorporated into every scent, you will have the genuine scent of Luskan with you whenever you go. Just let us do the traveling, so that you can do the reminiscing.

Memories of Myth Drannor

Some say that elves can remember things that are beyond time. Our scents of Myth Drannor seek to give you an insight into smells that transcend the ages! We bring you a variety of smells that can either transport you to a land unseen for centuries, or in some cases we can rekindle the dormant memories that you hold within you, if you are the kind of person that is in touch with a distant past.

Regardless, our scents are certified to be authentic to those that once pervaded the city of Myth Drannor, a mythical place that exists only in the past and memories and dreams of long lived creatures. Don't miss your chance to buy a piece of history that may just take you back!

Neverwinter Pine Sap

As a stark yet familiar contrast to the Icewind scents, Neverwinter represents a more temperate but still cold climate that comes with both chilling winters and mild, enjoyable summers. For those of you who grew up in the remote camps and lumber mills, this scent should be familiar. For those who only have a passing familiarity with Neverwinter cuisine and the logging season in that great city, this will refresh your memory with but a whiff. The maple and combination of fresh cut lumber, together with earthen notes, combines into a memorable scent.

Aurora's Note: Thanks to recent agreements, some portion of the sales of this scent go to the estate of Lord Neverember. Though we would like to celebrate this partnership, we would also like to provide full disclosure for our beloved customers. Aurora's Whole Realms Emporium prides itself on its transparency and good business practices.

Waterdeep Seabreeze

Looking for a more temperate scent? The smell of a Waterdeep harbour is one that the metropolitan and working class can both enjoy! This melting pot of varied peoples brings everyone to the harbour. Dogsled

Price 40 gp; **Weight** 400 lb.

A dogsled is a particular type of sled (or in some countries a small cart or carriage) designed to be pulled by a team of strong dogs, instead of horses or other draft animals. The sled is particularly designed to move over snow and ice, where heavier draft animals would plummet through

the ice, or get stuck in the snow. Here the dogsled will be able to move through the snow unhindered, enabling its owner to keep moving.

A dogsled from Aurora's comes in one of two styles, depending on its point of origin. The first is a standard dogsled, created from strong timber that's grown in cold climates, for superior strength and flexibility, and comes with a covering of warm fur, usually that of a bear of some type. The other is manufactured from mammoth bones and tusks, with a cover made from mammoth fur and sinews that tie it into place and keep the sled's driver warm.

Aurora's Note: Sled dogs must be purchased separately. These are not included in the price and not all dogs are a suitable match for the role of a dog sled puller. For a dog sled to travel at full speed (i.e. the dog's speed) you must have a team of at least 10 dogs.

Dwarven Warsled

Price 20 gp; **Weight** 10 lb.

A dwarven warsled comes to us from the dwarves of Mithrall Hall. Essentially this is a tower shield, but where rails have been mounted on the front of the shield, from hardened and sharpened steel. This allows the shield to be used as both a sled (on snow or ice) and as a tower shield, though not at the same time. The sharpened rails and the size of the shield means that it can be used as an improvised weapon that causes 1d6 + Strength modifier bludgeoning damage.

Due to the sheer size and weight of the dwarven warsled, it cannot be used as a thrown weapon, but anyone proficient in shields counts as being proficient when using this as a weapon.

Handyman's Wagon

Price 125 gp; **Weight** 500 lb.

Our pre-built wagons are also all the rage, pre-customized to your specifications for the transportation of specialized tools and equipment. Buy one to avoid the rigamarole and time required to customize an existing wagon. We do the hard work for you!

Not only are our customizations world renowned, but we also offer state of the art and finely made wagons. Travel with style, and keep everything in its proper place. We believe in these wagons so much that we use them ourselves! Additionally, those sellers and traders that use our wagon may be interested in signing up for our consign-

ment deals, where we hand you packages to deliver and sell, and you get a portion of the profit! There's nothing to lose!

Longsaddle Hot Air Balloon

Cost 5,000 gp; **Weight** 800 lb.

(before inflation)

Invented several decades ago by a deluded mage of the Harpell family of Longsaddle, the Longsaddle version resembles nothing so much as a gargantuan toy. Able to rise thousands of feet into the air, a normal hot air balloon is dependant upon the prevailing weather for navigation. The Harpell mage was not satisfied with a few things about the original design: the amount of time it took to make the thing rise into the air, the necessity of ballast (and thereby lack of space and weight for cargo or passengers), and the fact that it wasn't possible to control where to go.

His solution to this: Mephits.

He summoned and bound a couple of steam mephits to the balloon itself (having fireproofed it after the initial attempt went wrong) and bound another to the rudder that he attached to the basket, enabling him to control the speed of the balloon's rise as well as its direction of travel.

Shortly after creating the contraption, he set off on his first epic journey across the Realms. Sadly he was never heard from again. Our experts were able to piece together the leftover plans and make them into a safer version, which we are now happy to provide to our customers.

Anyone occupying the balloon is immune to the effects of non-magical cold, due to the temperature generated by the steam mephits.

Aurora's Note: As described above, the original inventor of this particular contraption disappeared after taking off for the first time. As such we do not offer our usual terms and conditions for this particular item. Any sales are *final*, and Aurora's will not be held accountable for any disappearances, mysterious or otherwise, that involves this particular item.

Sleeper Wagon

Price 250 gp; **Weight** 600 lb.

We also sell sleeper wagons that can be used to travel over long distances. You can sleep soundly in our sleeper wagon's cabin that will accommodate up to four people. Whether you are making a weeks-long journey, or a day trip to the next town over, this wagon is the pinnacle of comfort. Fold the beds up for a wide common area that can be enjoyed during the daylight hours.

While we don't recommend that you live or spend more time than necessary in a sleeper wagon, those who do as part of their profession have given testimonials that it is the most comfort they have found on the job. If

you don't trust us, make sure to ask the many wonderful performers that swear by our sleeper wagons!

Aurora's Note: The roof can accommodate up to three people comfortably, with two facing forward, and one facing back. In an emergency, you can remove parts of the wagon to use as cover in case you should run into some manner of danger. Just remember to lash your horses and get an alert driver or two for those trips through troubled territory!

Winterization (Wagon)

Price 50 gp; **Weight** +25 lb.

The beautiful frozen lands of the north may seem like a distant and dangerous location, but you too can traverse the tundra and experience the wonder of the land of ice and snow. Our specialized winterization service is just for you! We specially cure our wagon materials to prevent winter wear and tear, and our

winter wheels are some of the best in the business!

Don't get left out in the cold. On longer journeys, one of our winterized sleeper wagons can be the difference between life and death! Just remember to rely on Aurora's Whole Realms Emporium for all of your winter wagon needs!

Aurora's Note: We are not responsible for harm or death caused by extreme temperatures in a winterized wagon. Please exercise caution when traveling in cold climates. Do not start a fire in the winterized wagon.
