# THE MISTS OF AKUMA CAMPAIGN SETTING

*It has been three and a half millennia since the dawn of mankind; monsoons have become more and more common since the roiling, demon-spewing Mists of Akuma first appeared, and the sun's light grows duller with every day that passes after the end of the War of Kaiyo more than a century ago. A pall of darkness has fallen on Soburin and even its greatest heroes are mired in the petty intrigues and never-ending slights of aggressive clans. Spellswords and mercenaries cross the countryside in search of fortune, leaving the poor and meek to fend for themselves or die in the harsh reality of a broken world where technology has been either abandoned as heresy or perilously embraced.*

# IMPERIAL DRAGONS

Long ago in Soburin's ancient past—prior to the Mists of Akuma or the Kengen occupation, well in advance of the idyllic rule of the original Masuto Emperors, and millennia before even the Ichizoku Wars—majestic creatures ruled over the realm, grand serpents unmatched in prestige and power.

The Imperial Dragons of Soburin, though they were not known as such then.

In the earliest historical records there are only great miracles and horrible atrocities attributed to these powerful entities: vengeful Kutabare slaughtering and destroying Wasure Island; the aquifer of Fukanō borne aloft through the will of Subarashidesu; Sunēkuman slithering across the earth to form the marshes of Supai. For countless years the enormous serpents were the ultimate authority in the lands of Soburin, the arbiters of final justice and virtually unopposed saved by one another for untold centuries. Only when the first Imperials rose to power nearly four millennia ago—twenty-two brothers and sisters if the stories are true, each a master of both magic and blade—were the dragons confronted by beings that matched them in power.

## THE IMPERIAL SIBLINGS

Unbearable violence descended onto the realm as the Imperial Siblings waged war on the serpents of the land, sea, and sky. Overwhelming supernatural onslaught forced the humanoid races to band together under these martial legends, engaging en masse in conflicts with death tolls that left hundreds of soldiers dead for every dragon slain. The mythical creatures eventually relented, striking agreements with their foes for tribute and territory in exchange for the cessation of hostilities. In victory each of the Imperial Siblings came to rule over their own region of Soburin, creating the prefectures that still stand today.

## SERPENTS OF THE ICHIZOKU WAR

Newly named and shown great deference by the peoples they once slaughtered, the Imperial Dragons watched with growing amusement as the years passed and the plans of their enemies faltered. The children of the Imperial Siblings grew apart with every decade, losing respect for one another and increasing in avarice with every generation until the first skirmishes of their forces quickly exploded into the Ichizoku Wars. For over two thousand years the clans waged bloody war with one another, engaging in alliances as quickly and often as betrayal, churning through the citizens under their rule at a steady rate that fluctuated only slightly as new generals replaced the old.

Bribed by great hoards of treasure some of the Imperial Dragons did not abstain from the Ichizoku Wars, but nearly all worked in tandem "against" one another. The death tolls of the battles they fought in were greater even than when the Imperial Siblings faced them down, and now they are the subjects of epic ballads, poems, and plays all over Soburin (often aggrandizing the great serpents as much as the soburi heroes that survived them). Though to many it is nary a rumor, the most educated and insightful scholars suspect that the end of the Imperial Dragons' involvement in the Ichizoku Wars—and the rise of the 23rd family, the merchant ancestors of Emperor Hitoshi Masuto—are not unrelated events.

These historical theories are cemented by the long and enduring peace that came after the clans finally ended their conflict, their leaders thought to have been persuaded to recognize the authority of the Masuto by the serpents that so easily slaughtered their warriors. The Imperial Dragons retreated to the mountains and far-flung wilderness of Soburin to live among the oni driven back by the blades and spells of the prefectures, largely divesting themselves of public tribute and becoming a myth to most soburi.

## COWED BY THE KENGEN

Though they may once have been the masters of the skies over Soburin, even the Imperial Dragons were undone by the fleets of airborne technological wonders of Ceramia. Responding to a summons from Emperor Masuto, the majestic serpents fought valiantly in the Battle of Gyakusatsu before it became clear that the sheer number of pilots arrayed against them meant inevitable defeat. Retreating back into the mountains and calling on their neighboring monstrous lords for protection only proved to the oni that they too would be undone by the invaders, and a new alliance was struck.

In exchange for using their mythical powers to craft shrouds against the occupying soldiers left by the Ceramian military, the oni lords offered the lives of their servants to fight off any of the occupiers that penetrated the serpents' enigmas. Hidden from discovery by the Imperial Dragons for over a century, the other supernatural denizens of the wilderness and mountains survived the Kengen occupation, but their alliance failed to hold when the danger finally passed. After Emperor Hitoshi rose to rule over Soburin, the Imperial Dragons have become emboldened, staking out new territories for themselves in the wilds often in the face of their monstrous former allies.

Now the Imperial Dragons have fallen back on their old ways, shrouded still in mystery and practically a myth to most of Soburin—but not all. In the regions farthest from the influence of the Imperial government a few of the enormous serpents demand tribute and obedience once more, carving out fiefdoms of their own once again. The rare heroes that stand against them all inevitably fall, and it is only a matter of time before a reckoning comes: either by ancient claw or enchanted blade.

## RIVALRY OF KINGS

The Imperial Dragons have always been at odds with not only the descendants of the Imperial Siblings, but the greatest oni lords as well—the Yai Kings. These masters of the elements have always chafed at the mere presence of the great serpents, jealous of their power and hateful of their immunity to the most powerful oni of Soburin's worldly abilities. Even the appearance of Ceramia's military failed to persuade these opposing forces to bury their rivalry and throughout the Kengen Occupation the few Imperial Dragons that the invaders were able to find only did so thanks to the manipulations of the Yai Kings. More than anything else, the Imperial Dragons seek to tear down these powerful oni lords and watch their grand fortresses crumble, falling once and for all to serpentine might. Many a soburi has gone to seek them out, agreeing to help remove the Yai Kings from power, but those who do are almost always fools; the Imperial Dragons do little that truly benefits anyone but themselves and most of these interlopers lose their lives as petty distractions to much grander schemes (ploys that some think may span centuries).

## IMPERIAL ALIGNMENTS

Unlike their chromatic cousins, Imperial Dragons are not beholden to any one alignment—only predisposed to fall towards evil or rise to nobility (though most are of the former variety). Truly legendary underworld dragons, like Tsuki the Rising Moon, are lauded as heroes in Soburin's history, valuing the lives of all the clan's retainers as well as their serfs. Usually an Imperial Dragon settles on an alignment around adulthood, rarely deviating from it after it is established.
