

THE LIBRARY OF ZUNDAPP

600 BOOK TITLES FOR USE IN DUNGEONS & DRAGONS FIFTH EDITION

THE LIBRARY OF ZUNDAPP

Welcome to the Library of Zundapp - being a catalogue of the collected books and publications in the library of Zundapp the Mage. We know from the writings of J.L.Borges and T.Pratchett, that all libraries everywhere are connected. This library contains many strange books both magical and mundane. Some of these books have come from other worlds, a few have even found their way from our own world. The subject matter is extremely varied, covering fiction and non-fiction, myths & folklore, magic, science & natural philosophy, engineering, botany and natural history, songs & dances, art, sculpture, cookery and even politics. There are children's books, books in other languages and reference books. Some of the titles are deliberately obscure or mysterious.

HOW TO USE THE LIBRARY

There is very little to tie this list to any specific game setting. (A few placenames are from the author's own setting; but even this has been kept to a minimum.) The list is offered for use in D&D Fifth Edition; but it could be used in any campaign. You might pick individual books from the list to populate your world or use the entire and complete library. Feel free to add, ignore or alter any particular titles according to how they fit into your world setting. These are of course just titles, and what the contents of each book are in your world is entirely up to you - the descriptions are only offered as suggestions. They might contain important background information on plot points in your campaign. Or magical secrets perhaps? Or even details of a specific tool proficiency? The books are not in a specific order; but have been given numbers in order to allow random selection by dice. There are 600 books in total, so a d6 and d100 should enable you to select any at random. Or you might simply and quietly browse the shelves of the library and choose for yourself. As always, your silence is appreciated; both to ease the study of other readers and because the books themselves like it that way.

THE BOOK TITLES

First roll 1d6 to find which bookshelf

1. BOOKS 1-100

No. Title	Description
1 Locksmithing for the Curious Student	A practical guide to making & breaking locks & traps
