

Victorian Firearms for GURPS

These tables were compiled using Handguns of the World, Small Arms of the World, **GURPS: High Tech**, **GURPS: Old West**, and 3G3. All the usual legalities about who owns what apply. Distribute freely. If anyone has stats on the .30 Krag round, pass them on to me, so I can add them to this list.

Notes:

The cheap (40% price break) version of the Adams revolvers are pinfire copies made on the Continent.

The 1870 Gasser uses a carbine round and will explode on an 18, just like the Colt Walker.

The Mannlicher M85 was a commonly found weapon in the pre-WWI IRA, and were known as "Hawth Rifles" from the port they were smuggled into.
