No similarity between any of the names of characters, persons, and/or institution in this publication with those of any living or dead person or institution is intended, and any such similarity which may exist is purely coincidental. Printed in the United States of America.

Planetary statistics are listed in Standard Imperial Order: Name, Hex Location, World Size, Atmosphere Type, Hydrographic Percentage, Population Exponent, Government Type, Law Level, Technological Level Bases Code, Remarks, Travel Zone, and Gas Giant. An Additional symbol of -- has been added to Technological Level to indicate those worlds which have no population or whose statis is being reviewed by the Imperial Survey Board. Stellar Maps printed in the Trailing Frontier Zones still adhere to the Canmoid Projection popular in traditional Solomani circles.

CRUCIS MARGIN SECTOR

Background

The Crucis Margin is located slightly rimward from the center of the Trailing Edge of the Imperium. No system in this sector owes direct allegiance to the Emperor though mutual non-aggression pacts exist. The Crucis Margin is one of the group of sectors of mixed client states known collectively as the Gateway Quadrant. This area of mixed states separates the Imperium from the domains of the Hive Federation and the Two Thousand Worlds. The sector name is derived from the largest independent state in the sector, the Union Crucis.

Imperium Involvement

No worlds in this sector owe allegiance to the Imperium although most systems have a majority population of Humaniti. Imperial interests are furthered through commercial and political activity. Client States, especially Sphere Fenix, have been encouraged to act as Imperial Surrogates.

Hiver Involvement

No worlds in this sector are settled by the Hive Federation although their trading vessels are active in the Trailing Rim quarter. Significant military forces are de-emphasized but commercial and political activity is great.

K'kree Involvement

No worlds in this sector are settled by the Centaurs although trading vessels are active in the Trailing Core quarter. Significant military forces are de-emphasized but commercial and political activity is very high.

Mandanin Co-Dominion

Information concerning the precise internal structure of the Co-Dominion is scanty and nebulous at best. It is a cooperative state with complete intergration between the two member species. Imperium historical information appears to have been accidentally destroyed during the last Civil War. Only fragmentary texts of previous records remain. Previous organizations in this area appear to be clan/commercial structures of no great extent or permanence. Several non-human intelligences were also present in the region, at least one in the early stages of starflight. Theoretical research on hyperspace was being conducted but there were no plans to construct jumpdrive prototypes yet. Alien-Human contact was peaceful and constructive. Three centuries ago a joint Human-Alien culture started to spread out simultaneously from several nuclei systems. Growth has been steady since then, emphasizing cooperative ventures between Human and Danin authority structures. Only a century or so ago a militant revolution completely restructured Mandonin Society and initiated an aggressive expansionist policy. Information of any sort about the internal affairs of the Mandanin Co-Dominion is suppressed. Internal trade is restricted to authorized companies and external trade is limited to several supervised starports. Recent expansion attempts into the Marlan Primate have been decisively defeated. Past incursions into the Krax Confederation indicate new expansion will be aimed in their direction.

Hv'ika Kamlin

The Hv'ika Kamlin is an independent state composed primarily of the members of an Alien Minor Race and a Minor Race of Humaniti. They are a Client State of the Hive Federation, greatly influenced by it and militarily allied. While active in commerce and political affairs, the predominant philosophy is not militarily aggressive.

Ramayan

Ramayan claims precisely one system in this sector and has not modified its borders in this direction in over five centuries. Trade is not restricted but most Ramayan citizens are extremely conservative and philosophically inward directed. Political attitudes are Neutralist, though friendly towards the Imperium. A mutual defense treaty with Sphere Fenix has been in force for the last three centuries.

Sphere Fenix

Sphere Fenix was originally settled by a very diverse group of refugees from the collapsing First Imperium. During the Long Night, these fugitives flourished into a series of mini-states. About 500 Imperial dating, a series of small but bitter wars broke out. In 724, the three surviving states declared peace on each other and met to discuss unification. Though the precise details of governmental structure took over 28 years to develop, Sphere Fenix dates its birth from that meeting. Though internal unrest has occurred since, the overall prosperity has continued to increase. A mutual defense treaty was signed with Ramayan in the 8th century Imperial. Technical assistance is received from the Imperium Military Services and Imperial Security is rumored to have great influence. In spite of having fought no major wars in centuries, military prowess is high and it has become traditional to serve a term or two as a Mercenary in one of the surrounding sectors, especially the Marlan Primate.

Chhung Kuo

Chhung Kuo is a term from an ancient Solomani language meaning "Middle Kingdom". It too was established close to the end of the First Imperium by refugees from the turmoil. In order to unite the disparate elements, a deliberate attempt was made to establish a revival of the "Golden Age of Chinese Culture". Though primarily settled by Humaniti of Solomani ancestry, a significant minority of the population is composed of resident Alien members of the Minor Races. Philosophy is directed towards constructive cooperation with a conservative respect for tradition. Both the Humaniti and the Minor Races maintain universal military training for self defense but seldom serve as or hire Mercenaries. Trade is encouraged and a high degree of interest is maintained in technical progress. Diplomatic policy is defensive and mutual non-aggression pacts have been concluded with all neighboring states.

Union Crucis

Union Crucis also began during the end of the First Imperium as a combination of refugees for self defense purposes. In this area, though, two other factors came into play, the presence of several Minor Races of Aliens on the planets and the proximity of two separate Major Races of Aliens. Interspecies cooperation and competition has always been present in this area. Humaniti, as the most numerous portion of the population, formed the core around which groups gradually coalesced into larger and larger political units. Open warfare was uncommon although small skirmishes were frequent among the different Humaniti factions. These four factions are the Suo, Sliv, Cast, and Nar with 27, 19, 28, and 15 systems respectively. Many of the Suo planets have trade relations with the Hv'ika and the Hivers. Most Cast and some Sliv planets trade with the Chhung Kuo and with the Two Thousand Worlds. Around a century or so ago an expansionist political party gained prominence in the Nar systems. Unable to expand into the Union, armed incursions were directed into the Mandanin Co-Dominion. At first successful, Co-Dominion counter efforts became more and more forceful, completely halting Nar expansion. Economic pressure upon the Nar by the Suo and Cast to cease expansion was resented by Nar. Sliv extremist groups also viewed this pressure with extreme disfavor. At the present time internal dissent is at the highest level it has been since the formation of the Union Crucis. No faction is yet willing to utilize armed force on each other but political and espionage conflicts are increasing. All political moderates are strongly urging peace and accommodation but the situation is fluid. The Humaniti and all major resident Alien political factions are exerting as much calming influence as they can but some unknown factor seems to be agitating for breakup of the Union.

Rm Nai

Rm Nai involvement in this sector comprises five systems at the Spinward Rimedge. Of Solomani extraction, the Rm Nai are xenophobic and advocates of Human Supremacy. Internal power struggles have, over the last four centuries since formation of the Rm Nai state prevented expansion. A strong ruler has just recently consolidated her position and now the Rm Nai are ready to move outward.

ARK SUBSECTOR

The Ark Subsector is primarily occupied by Sphere Fenix with a few independents on the Spinward edges. Though well fortified and patrolled, this settled area is not threatened by its most immediate neighbor, the Marian Primate. In fact a goodly percentage of the Marian Forces are Fenix Mercenaries. The major threat in the past has been from the Mandarin Co-Dominion to Rimward.

Independent i Sphere Fenix •

NEGOIUL SUBSECTOR

The Negoil Subsector is the core of Sphere Fenix and contains those systems first settled. Thoroughly devastated in the Wars of Unification, massive efforts have repaired almost all damages. The capital of Sphere Fenix is located in this subsector at Rutli. Moderate military forces are stationed in this subsector since external threats are somewhat less.

Independent i

Sphere Fenix •

SOURIS SUBSECTOR

The Souris Subsector contains systems from four separate political groupings as well as 10 independent systems. The Ramayon claim only Vamitra, and had settled there 5 centuries ago. Toward Trailing are two systems of the Chung Kuo or Middle Kingdom. The largest grouping is the 10 systems of the Sphere Fenix to Spinward. Three systems of the Union Crucis occupy the Rimward edge. Considerable trade is carried on between Sphere Fenix and Chung Kuo across the independent systems by means of Free Traders. With the worsening political situation in Union Crucis, defensive forces at Souris, Doven, and Tsung have increased their patrol activity.

Mandarin Co-Dominion v Independent i Sphere Fenix •

OLSZTYN SUBSECTOR

The Olsztyn Subsector contains that portion of Sphere Fenix which is located between the Mandarin Co-Dominion and the Union Crucis. A large portion of the Sphere Fenix Navy is currently based on Soluk and Kufra in response to the Mandarin threat and the Union Crucis political situation. On the Trailing border, five of the seven Union Crucis systems belong to the Sliv faction with one belonging to the Nar. Independent systems in the region have most recently been the object of dispute between Union Crucis and the Co-Dominion.

ASTURIAS SUBSECTOR

The Asturias Subsector is divided between the Rimward 13 systems of the Union Crucis and the Coreward 5 systems of the Chhung Kuo. Strife in this area has been infrequent. Considerable trade is carried on between the Union in this subsector whose members are all either Cast or uncommitted and the Chhung Kuo. Several K'kree companies are involved in commerce in this subsector. Shun, Dax, and Cruz have resident Alien populations greater than 25% while Alien populations are above 10% on Luarca, Ferrol, Sestao, Heng-o, and Estella.

Independent i

ACCRA SUBSECTOR

The Accra Subsector was the scene of armed clashes between the Mandanin Co-Dominion and the Nar faction of Union during the first half of the last century. Nar forces originally took over Daboya, Narok, and Tamale. Space battles took place in the Yendi, Ngong, Wenchi, and Guerzim systems. Mandanin forces counter-invaded and liberated Daboya and Narok. By terms of the peace settlement, Nar forces withdrew from Tamale. Significant military forces still patrol this sector on both sides.

MANDANIN CO-DOMINION

JUDGES INFORMATION ONLY

The Mandanin Co-Dominion arose as a result of a combination of a mutant strain of Danin and a religious revival. The initial impetus is now wearing off and internal factions are beginning to crystalize.

The Danin are a warm-blooded, four limbed race of vaguely reptilian aspect. Each Danin is tri-sexual, the various sexual phases occurring during the different portions of ne's life. The order is Egg (thet), Subadult (ken), Male (nit), Female (ten), and Senior (een). Humans have taken to using the Danin words for the separate phases and the pronoun for any Danin in general (ne).

Developed from a social type of Gatherer, the ability of the post reproductive phase of Seniors (een) to settle conflicts between different packs without violence speeded up the course of civilization among Danin. Though technical progress was not as rapid as comparable races, planetary-wide social units were achieved at a relatively early stage. Progress in biological and social sciences was also somewhat more advanced than standard technical levels would indicate. Initial contact by the Sa'Dintinin Company was quite peaceful. The basic philosophy of the major Danin beliefs were very tolerant in relationships with other sentient species. Mutually beneficial projects were quickly arranged and within decades, small colonies composed of Danin and Human were flourishing on nearby planets. With their greater skill in life sciences, the Danin found it relatively easy to establish self-supporting ecosystems with a minimum of time and material. This ability freed a greater proportion of the Human component to concentrate on industrial development. Cooperative colonies quickly spread over the surrounding systems into adjacent subsectors.

For most of the history of this association, the attitude of the component members towards outside entities was non-aggressive. Some two centuries ago, a minor religious-political cult on Kalradin (Mandin - 0416) underwent an almost explosive expansion for as yet incompletely understood reasons. The cult had a most efficient and aggressive attitude towards conversion and expansion.

At about the same time a mutant strain of Danin arose with a lesser fertility rate and a greater physical size, speed, and strength. With a lesser reproductive drive, the energy of this variant Danin turned outward with a more aggressive attitude towards outside dominance. While this strain normally would not be significant in numbers due to the lower fertility, it was deliberately bred for. It seems that the neighboring state to Trailing was exerting extreme diplomatic pressure on adjacent portions of the Human-Danin colonized areas. The Human Danin chose to resist that pressure with military force.

The Danin proved not to be very adept at space maneuver or combat. The new strain proved an adept warrior on land and so was bred in great numbers. This freed large numbers of Humans for space duty since the Danin now formed the home defence forces and the assault landing teams. Soon several sharp clashes proved the efficiency of this arrangement and the pressure from Trailing areas ceased.

Now there were large numbers of unemployed warriors; the Humans among whom the expansionist sentiment was prominent, and the Danin who also had an expansionist element of warriors. These factions forced a political reorganization with a more rigid central authority based upon the military command structure recently set up. Clashes with the Krax Confederation and Marlan Primate soon occurred. A few local successes were scored but further expansion would take more resources than the bulk of the essentially non-aggressive Danin and Humans were willing to provide.

During subsequent operations much greater opposition was encountered from both the opponents and the basically conservative internal structure. The Danin developed a new strain of their species which was closer in biology and attitudes to the basic stock, but was much more adapted to space conditions. Emphasis on breeding of the warrior strain was switched to the spacer strain. Over the last half-century or so the relative proportions of warriors have shrunk rapidly in favor of the spacers. Over the same time period, the Kalradnist cult lost much of its internal cohesion and developed several divergent factions.

At the present time, the higher levels of the government and military services are filled with adherents of the former aggressive and expansionist philosophy. The lower and mid levels have a much more cooperative and conciliatory attitude towards their neighbors.

Imperial policy toward the Mandanin Co-Dominion is to placate the high levels of authority, stall for time, and encourage advancement of personnel in the mid levels to positions of greater authority.

Rumors
Roll 3D

- 3 There have been two assassination attempts this last week on minor Spaceport Officials. Both attempts were very poorly organized and mounted by obvious amateurs.
- 4 Consult a random Non-Local Rumor Sub-Table.
- 5 1D + 1 Security Agents were inquiring this morning concerning the whereabouts of one of the party. He/she is sought for questioning in regards to the background of a notorious local smuggler.
- 6 Just down the line, two systems over, they lost three Merchant Vessels to Pirates in the last month.
- 7 Traffic in Artifacts of the Ancients has increased tremendously of late. Local Military Security is confiscating any such Artifacts found.
- 8 A prominent local Politician needs to get off-planet fast. The local Underworld says he double-crossed them and have his name on their "hit list".
- 9 A Local Port Official was caught embezzeling funds. He/she escaped from custody and is being sought by both the Planetary and Starport Officials. A reward of 10,000 CR is being offered for the apprehension of the fugitive.
- 10 The word is out that the local Black Market has got a lot of hot weapons for sale. It is said that even Fusion Guns can now be obtained real cheap if you know just who to ask (roll 1D: 1 - 4, True; 5 - 6, False).
- 11 New customs procedures are about to be implemented to make smuggling a lot more difficult. The local Customs Officer just got chewed out for not catching a series of big drug shipments this last month.
- 12 See Local Rumor Sub-Table.
- 13 Some of the last bunch of Ancient Artifacts don't look like anything ever seen before. A local Archeologist is claiming that there were at least two different Ancients cultures. He calls them the Forerunners but his colleagues don't think much of his theories.
- 14 New Custom Regulations will come into effect next week. Some Politicians think Merchants aren't paying their fair share of the local Spaceport maintenance expenses.
- 15 See Local Rumor Sub-Table.
- 16 A crewman off a just landed Merchant Ship says they saw two Light Cruisers rescuing men off a damaged Battle Cruiser. They were told to remain clear and they never did find out if it was an accident or battle damage.
- 17 The _____ Shipping Line has gone bankrupt. Some of the local company employees are trying to get back wages owed them by selling off company property.
- 18 Mercenaries in transit through this system are disappearing. Two officers and eight noncoms have vanished from local hostels in the last month.

Rumors on Independent Planets

- 1 Agents of a nearby major power, _____, are plotting the overthrow of the local government.
- 2 Local Military Forces are recruiting. They are especially anxious to obtain Naval Gunnery Officers and experienced Weapons Systems Technicians. 10,000 CR per Skill Level are being offered as an enlistment bonus.
- 3 Computer Technicians are being sought by the Ambassador and Business Agent of a neighboring system government. A complete renovation of the nationalized industrial system is being planned and outside experts are being sought.
- 4 Things are getting pretty bad on _____, two systems over. Armed revolution is about to break out and it promises to be a real bloody mess.
- 5 A valuable Mineral Strike has just been made on one of the moons of an outer planet in the _____ system (Roll 1D: 1 - 3, True; 4 - 6, False).
- 6 An unknown Military Vessel was damaged in engagement with local forces. It managed to evade the defending vessels but was damaged too greatly to be able to Jump. Merchant Ships have been picking up some funny radio signals lately.

Rumors on Mandanin Co-Dominion Planets

- 1 The Commander of the local Base is cracking down on fraternization with non-citizens (True).
- 2 Younger Co-Dominion Officers will pay a great deal for high quality text books on Zeno-History and Zeno-Politics (True).
- 3 Imperium Spies are active on this planet. A player character will be suspected of espionage on a 1 on 1D.
- 4 Danin of the Warrior strain are being secretly assassinated by unknown agents (False).
- 5 Some special Anagathic Drugs were stolen from a secret government research laboratory. A dose can be obtained on the Black Market for 50,000 CR (False).
- 6 Someone stole a lot of computer records from the local Military Base and is trying to sell them (Roll 1D: 1 - 4, False; 5 - 6, True).

Rumors on Chhung Kuo Planets

- 1 Reproductions and records of Ancient Solomani Chinese are very valuable to high level officials (True).
- 2 For the past three years a local shipping company has been hiring only men with Imperium Navy experience (True).
- 3 The maneuvers the local Naval Squadron is now holding are just a cover for a Security Bureau Search Operation (Roll 1D: 1 - 4, True; 5 - 6, False).
- 4 A new computer based upon revolutionary design principles is being demonstrated by its inventor. He wants financial backing and foreign business representatives (Roll 1D: 1 - 4, True; 5 - 6, False).
- 5 A local officer is hiring Mercenaries to raid Union Crucis (False).
- 6 Hro Trien Fu, a local high official has been accused of corruption and executed (Roll 1D: 1 - 2, False; 3 - 6, True).

Rumors on Union Crucis Planets

- 1 Sphere Fenix has offered to annex any of the Sliv faction worlds if the Union breaks up (False).
- 2 Mandanin Co-Dominion forces are poised to attack Union Crucis at the very first sign of weakness (True).
- 3 Rm Nai Ambassador has asked for an offensive military alliance against the Co-Dominion (False).
- 4 The Hv'ika Kamlin would be prepared to offer military defensive services to the Suo faction worlds if the Union Crucis breaks up (False).
- 5 The Cast and Suo factions have made a secret alliance against the Nar (False, the Cast and Suo have concluded a mutual non-aggression agreement).
- 6 An independent world to Rimward wants to join Union Crucis (Roll 1D: 1 - 3, False; 4 - 6, True).

Rumors on Sphere Fenix Planets

- 1 Secret Agents of the Marlan Primate have been hiring Mercenary forces to serve as Independent World Strike Teams. The avowed reason is to divert Co-Dominion defensive forces away from their own borders (Roll 1D: 1 - 5, False; 6, True).
- 2 A new type of long distance Commerce Raider was lost on its shakedown cruise (Roll 1D: 1 - 4, True; 5 - 6, False).
- 3 Ramayan is secretly massing its Naval forces for a quick territory grab to Spinward (False).
- 4 Secret Imperial equipment was discovered in the wreckage of a crashed ship in a wilderness area of a planet two systems over (Roll 1D: 1 - 4, True; 5 - 6, False).
- 5 Krinyan Industries has perfected a new process for producing synthetic Gems of very high quality (Roll 1D: 1 - 4, False; 5 - 6, True).
- 6 Mercenary Officers with experience commanding Submarines are being sought by the Commanding Officer of the local Space Navy Base (Roll 1D: 1 - 5, False; 6, True).

Encounters on an Inhabited Planet

Roll 3D

- 3 An armed Security Guard stops you. After checking your ID you are warned that while travel in this area is not prohibited, it is so hazardous that the local government will take no responsibility.
- 4 1D + 1 Police rush past in pursuit of 2D grubby youths.
- 5 An outdoor demonstration of political solidarity is turning ugly. Thrown rocks and bricks menace anyone on the periphery of the crowd. Roll Dexterity or under on 2D to avoid taking 1 point Damage.
- 6 While passing a darkened alley a side-glance discloses a bleeding body. (Roll 1D: 1 = Body is a trap with two more ruffians than the party waiting in the shadows. Ruffians are armed with Blades and Body Pistols; stats of 777777. 2 - 3 = Body is dead and has been stripped. 4 - 5 = Body is unconscious and is a normal citizen victim - 777777. 6 = Body is unconscious and is a local law officer - 999999.)
- 7 An alarm is sounding in a nearby building. As the party approaches, 1D emergency vehicles screech to a halt. 1D seconds after the first team members enter the building a scream is heard and a hoarse shout of "Medic! Medic!" rings out.
- 8 The party is approached by 1D local peddlers hawking "Quaint Native Handicrafts". They are insistent but will leave if given a firm refusal. Judges Note: These peddlers would be a good source of local rumors and information.
- 9 See Local Encounter Sub-Table.
- 10 A single uniformed law enforcement officer approaches the party and boredly requests they accompany him for "an informative matter". If the group refuses, he shrugs, and make a notation in a record book as he walks away. If the group agrees, they are taken to a nearby van and shown a quick taped lecture on the scams, swindles, and crimes that are currently popular locally. The officer will hand out brochures which contain a map and a city directory. He will wish them a pleasant visit and will answer any general questions about the city and planet.
- 11 The party is approached by a "Services Specialist" who operates as the law officer in Number 10 above. A character with a Streetwise Skill will note that this person may be bribed to give general information on illegal services and contacts as well.
- 12 See Local Encounter Sub-Table.
- 13 The group encounters 1D + 1 Sidewalk Salesmen hawking minor trinkets and souvenirs. They are selling from small portable booths and will not follow the party. Judges Note: These Salesmen are a good source of local rumor and information.
- 14 In the intersection ahead a Light Ground Car hits a piece of debris and skids out of control into a signpost. A bystander glances into the vehicle and yells "Medic!"
- 15 See Local Encounter Sub-Table.
- 16 A scruffy-looking individual dashes out of a nearby store with a Blade in one hand and a package in the other. The shop owner staggers into the street clutching a light wound and yelling "Stop that thief!" The Thief is 657434 and the Shop Owner is 743877. If the party catches the thief, the owner will be grateful for the return of the moderately valuable package. He will treat the party to a good meal at a local restaurant and will serve as an accurate source of local information.
- 17 1D Police vehicles roar past sirens wailing and lights flashing. Each party member must roll Dexterity or less on 2D to avoid being spattered with mud and debris.
- 18 Two slugs ricochet off a building just missing one of the player characters. A diligent search will not reveal a trace of the sniper. Local informants are puzzled and at a loss for the attacker and reasons why.

Encounters on an Independent Planet

- 1 50 small drums of lubricating fluid fall off a passing vehicle and several shatter open. Each party member must roll Dexterity or less on 2D to avoid being spattered with fluid.
- 2 The party is approached by a Mercenary Officer who wants to buy/sell certain items of Military Equipment. He will buy at the going price and has a 50% chance of being able to obtain any item or weapon of Tech 12 or lower Infantry Equipment.
- 3 The party is approached by a Mercenary Officer who wants to arrange transport for a Unit of 6D men and 6D + 20 tons of supplies and construction equipment to _____.
- 4 The party observes a furtive individual spraypainting a political/religious symbol of protest on the street/a wall and run off into the shadows. Judges note that this could be a contact with any local underground movement. (Roll 1D: 1 - 2 = Disgruntled individual with no further contacts. 3 - 4 = Further contacts possible. 5 - 6 = Individual is an agent provocateur for the local security forces.)
- 5 A burst of machinegun fire cuts down a nearby pedestrian. Each party character must roll Dexterity or under to avoid taking 1 Hit Point of Damage from ricochets.
- 6 An overwhelming group of Security Guards siezes your party by surprise. Upon examining your ID's, the leader indicates that you are not on his search list. He warns you about associating with or helping certain dissidents and releases your party.

Encounters on a Mandanin Co-Dominion Planet

- 1 Your party encounters 1D + 1 Een arguing noisily but non-violently in the middle of the street. Traffic is calmly detouring around them.
- 2 Two Humans are arguing about something. At the approach of the party they glance in your direction, break off the conversation and stride rapidly away. (These two ordinary citizens were recently bilked in a business deal with some Imperium Free Traders.)
- 3 A security team of one Human and two Danin Warriors armed with Tranquilizer Guns and Riot Batons politely requests to see your ID's. They find nothing wrong with your papers and bid you "Pleasant Visit", as they wander off. The Human is 988759, and Danin are AB9658 and BC8788.
- 4 Your party is approached by a Danin Officer, B98989, who offers to buy or exchange current textbooks on Military and Political History. Judges note that a week of study of this material would permit a character to read the material on page 22 except for the last paragraph.
- 5 The street is occupied by a religious ceremonial procession of 2D Een and more than 50 Nit, Ten, and Humans. They are marching quietly and gently chanting. Several bystanders, both Human and Danin, jeer a bit and wander off.
- 6 A formation of more than 100 Human and Danin Soldiers trot by in formation at full quick-march. They are in complete Tech 12 Light Infantry Combat gear and are reservists on a training exercise.

Encounters on a Chhung Kuo Planet

- 1 A large flock of ornamental birds thunders up in startled flight from a nearby ornamental garden. Each character in the party must roll their Dexterity or under on 2D to avoid being spattered with excrement.
- 2 Two gentlemen block a narrow passageway as they argue whose ceremonial litter has the right of way.
- 3 A small child in avoiding a careening vehicle strikes their head on a building wall. The injuries are not serious but the child is knocked out for 1D minutes. If helped by a player character, the parents, local shopkeepers, will be grateful and would serve as accurate source of local information.
- 4 A security officer approaches you and requests you to please clear the street. Shortly thereafter, a religious procession comes by taking 2D + 4 minutes to pass.

- 5 A large furry sapient six limbed Alien nearby is hit by debris falling from a building being demolished. Both front legs are injured to such an extent that he cannot walk. The sedative administered by a nearby para-medical renders the being incoherent. You recognize the symbol on the harness the being is wearing as belonging to a shipping company which has offices at the local starport. A local bystander hearing your comments says that with a Credit for fuel he will help you load the being on his truck and drive him to the port. Doing so will earn you his company's gratitude and increase your chances of finding profitable cargoes on this planet.
- 6 You encounter an outdoor play being performed in the park. Several minutes of watching and a roll of your Intelligence minus 4 or less on 2D will give the insight that Chhung Kuo citizens will pay quite high prices for Solomani Ancient Chinese Artifacts and Literature.

Encounters on a Union Crucis Planet

- 1 Your party is passing by a political rally that is getting out of hand. You are rounded up by Security Riot Police along with everyone else in sight. After an ID check you are released with no charges and an admonition to stay out of crowds. Total delay time is 1D + 2 hours.
- 2 You are accosted by a very nervous individual, he is seeking fast passage off-planet for a team of 1D + 3 political agitators. They will pay up to three times the normal price to leave within the next two days.
- 3 A local police official approaches you wanting to purchase anti-riot gear if you have any. If you have a ship with a cargo capacity of at least 50 tons he will want to hire you to pick up a shipment in the next system over _____. There is 100 tons at the factory and he will pay triple normal transportation costs for immediate shipment.
- 4 An Alien in the uniform of local security officials politely stops your party and upon certifying that you are from off-planet gives you a concise explanation of the local political situation. This very intelligent being will answer all polite questions for general information until his communications unit beeper sounds and he is called away to respond to an emergency.
- 5 A small lizard-like being loading packages onto a transport vehicle is pinned down as several heavy packages shift and fall. If you help it free it will indicate by signs that its injuries are slight and present you with a strange coin-like token. A passing police officer overhears your puzzlement as to what the token is. She informs you that it is an access card permitting limited access to the general informational library computer banks at the local commerce library.
- 6 A pile of debris slides off a passing vehicle as a load securing strap breaks. Each character must roll their Dexterity or under on 2D to avoid taking 2 Hit Points of Damage from hurtling objects.

Encounters on a Sphere Fenix Planet

- 1 As you pass a small open park two drunken Military Officers call you over and insist that you referee their duel. If you refuse a ribald suggestion follows you as you walk away. If you accept you immediately notice that they are using practice Swords and aren't really mad at each other. After a several minute exchange of attacks and parries as you call out hits and keep score, the two conclude their argument on Sword technique. They resume their interrupted carousing and invite you to join them. They are buying. The next several hours serve as a pleasant introduction to the higher class bars in town. The two officers are from a Naval Unit in Port and consider you a friendly acquaintance.
- 2 A stack of boxes being unloaded from a vehicle topples into your path. Each character must roll their Dexterity or less on 2D to avoid bruised shins and a slight movement penalty for the next two days.
- 3 A parade of sports enthusiasts celebrating the victory of their local team over an old rival blocks traffic for 1D + 3 minutes.
- 4 You are approached by a distinguished-looking gentleman. He is a political dissident seeking a discreet means of communicating with fellow dissidents on nearby planets. He will pay 100 CR now and 100 CR for a return receipt. While the material is sealed, he won't object to your reading it. It is a very scholarly paper upon an event in the past which has caused violent political differences of opinion. If a character understands the paper (understanding is achieved by 20 hours study and rolling under the combined Intelligence and Education minus 5 on 4D), the gentleman will serve as a reliable source of information and contact with other dissidents.
- 5 A security officer politely prevents you from travelling into a certain area of town. She explains that military exercises are in progress in that area and will not be completed until midday tomorrow.
- 6 A disbanding Mercenary Unit is auctioning off some of its equipment. Some bargains on medical and communications equipment are available. Character Medic, Electronic, and Admin Skill modifiers apply in spotting useable equipment and judging value.

Animal Encounters

Clear Terrain - Wagerwok: Intimidator, Size: 50 kg, Hits: 9/8, Armor: None, Attacks: 95 Teeth -1, Wounds: 7. The Wagerwok is a large furless mammel with fat deposits under its skin for warmth. Its head is flat and shaped like a shovel. It has large fangs that can do nasty damage. The Wagerwok hunts at night and feeds on whatever it can find. It prefers a fresh kill but is unlikely to attack a party of men unless they are sleeping. If surprised it will defend itself by vicious snarling and snapping but generally runs away at the first opportunity. Its skin makes poor leather, and it reeks when cooked, therefore it is considered a pest of little value.

Prairie Terrain - Geex: Flying Carrion Eater, Size: 3 kg, Hits: 1/6, No Armor, Wounds: 5 as Blade. This, unlike most Carrion Eaters is considered a vicious bird. When hungry the Geex will mercilessly attack living creatures. It has large talons and attacks in a lightening dive, with great agility claws its victim's eyes. A Geex will continue its dive attacks until its victim falls. Once a victim has fallen the Geex will then wait for it to die. It will fly away when attacked or surprised, and will only attack when it is hungry. Geex feathers are worn by Scouts as a sign of courage. They are rare and some Scouts prefer to buy the feathers rather than face a Geex's talons.

Rough Terrain - Whist: Intermittent, Size: 3 kg, Hits: 4/2, Armor: Jack, 3 Teeth. The Whist is a shy, fur-bearing animal. It's omnivorous, resembles a small monkey, and has a valuable waterproof pelt. It is agile, tailless, and considered harmless. It won't attack unless cornered, and its meat is also a common game food.

Broken Terrain - Rhetrex: Chaser, Size: 12 kg, Hits: 9/2, Armor: Cloth, 1 Claw. The Rhetrex is a small biped chaser which resembles a Lynx on two legs. Its upper paws have long razor sharp claws. It kills its prey by running them down and slashing a vital spot. Rhetrex travel in packs of 5 to 10 with one male per pack. The females do the hunting, and although they are only 3 feet tall, Rhetrex can kill large animals.

Mountain Terrain - Fez: Grazers, Size: 400 kg, Hits: 28/13, Armor: Cloth -1, 5 Horns. Fez are large beasts which travel in herds of from 50 to 100. In remote areas, herds have been reported as large as 10,000. The Fez has shaggy blue fur with a shiny red undercoat. Under certain atmospheric conditions, sunlight striking the Fez's coat creates an unusual spectral illusion. The Fez's fur makes warm clothing, its meat is delicious, and the hide can also be used to make shelters. Fez easily stampede and bulls are adept at goring with their horns when angered.

Forest Terrain - Pseudolog: Filter, Size: 100 kg, Hits: 8/9, Armor: Jack, 6 Teeth -1. The Pseudolog resembles a horizontal log fallen in the forest. It senses life forms near and then opens its mouth and sucks its prey into a well protected digestive pit. Half of the animal is underground so it is hard as well as dangerous to rescue a trapped companion since a Pseudolog's digestive pit can easily hold two average sized men.

Jungle Terrain - Tigermite: Eater, Size 1 kg, Hits: 4/0, Armor: Jack, 2 Claws. The Tigermite is a 6-legged insect that goes through a life cycle. It is harmless in the larvae and adult stages, but in the intermitant state it goes on a feeding frenzy, eating everything it comes in contact with. This frenzy will last for about 6 hours. From 1 to 1000 Tigermites can be encountered during a frenzy.

River Terrain - Master Eel: Hunter, Size: 400 kg, 12 meters long, Hits: 19/5, Armor: Mesh, 9 Teeth. The Master Eel lives on the bottom of rivers and when a large animal enters the water it strikes like a snake coiling around its victim, and then it drags it under the water killing it by a combination of squeezing and drowning.

Swamp Terrain - Dart Monster: Trapper, Size: 1600 kg, Hits: 20/12, Armor: None -1, 18 as Pistol. A cellulose mass which shoots tentacles into its victims. The tentacles have a sharp barbed end which penetrates the victim at high speed. The Dart Monster then pulls the tentacles back towards its muscular mouth opening and digestive cavity.

Marsh Terrain - Silver Paw: Killer, Size: 200 kg, Hits: 18/11, Armor: Cloth, 18 Claws. A large silver furred mammalian biped. It is sleek, muscular and will kill for the pleasure of smelling blood. The smell of blood drives it into a killing frenzy. It rarely retreats and eats its kill only if there is nothing else. Silver Paws are solitary creatures.

Desert Terrain - Mimicker: Siren, Size: 3 kg, Hits: 2/0, Armor: Jack, 5 Claws. The Mimicker is a psionic siren. It uses its psionics to determine which live forms are present and then mimicks that life form sound. Sometimes it uses a distress call, sometimes a mating call. It also uses a psionic screen to hide from its prey.

Vacuum Planet Encounters

Avalanche: The side of the mountain above and to the left/right/front/rear of the party is crumbling and sliding down towards the party. Throw Dexterity or Intelligence (whichever is higher) on 2D for each character on foot to take cover. If the throw is unsuccessful, throw Endurance or less on 2D to avoid 1D + 1 Hit Points in injury. Roll 1D, on 1 - 3 the Vacc Suit is also breached. Flying vehicles may avoid avalanches with a throw of 3+ on 2D (Die Modifier: Pilot Skill applicable). Ground Vehicles may avoid avalanches with a throw of 8+ on 2D (Die Modifier: Vehicular Skill applicable). If unsuccessful in avoiding, throw 3D to determine the extent of the avalanche; each pip indicates 10 minutes work by one person to free the vehicle. If the result is greater than 9, the Judge may apply an appropriate vehicle malfunction (adjust probability for ruggedness of vehicle construction). Players maintaining alertness for avalanches decrease speed to 2/3 and gain an additional Die Modifier of 3 on avalanche avoidance rolls.

Blocked Passage: The route being followed is blocked and is impassable to ground vehicles. Throw 2D to determine the number of man days of work necessary to clear a passage. Explosives and other equipment will modify the work time at Judge's discretion. Foot passage may be discovered on a roll of 6+ on 2D per man hour spent searching.

Cave: A dark shadow is noticed which proves to be the opening of a cave. It extends at least 4D meters and has 1D passages. On a roll of 6+ on 2D, there will be a minor Human artifact found; on a roll of 10+, a minor Alien artifact. More detailed tables on cave formation are available on pages 40 and 41 of the Judges Guild **Ready Ref Book**.

Craters: An extensive area ahead is covered with meteorite impact craters. The ground travel time is doubled for the next 1D + 3 kilometers.

Crevasse/Ravine: The terrain ahead has crevasses and/or ravines which obstruct passage. Throw 2D; on a roll of 8 or less, ground travel time is doubled for the next 2D kilometers. On a roll of 9 or greater, 1D + 1 hours must be spent travelling along the crevasse to find a passable place for vehicles. Individuals may attempt to leap/scramble across by rolling Dexterity or less on 2D (Die Modifier of +1 if Strength greater than 8). If unsuccessful, take 1D - 1 Hit Points of damage and check for Vacc Suit breach on 1 - 3 of 1D.

Deep Snow: Deep snow covers the area ahead and cutting ground travel speed in half for the next 3D + 4 kilometers. Tracked vehicles are unaffected.

Dust Pool: A low area in the terrain ahead is filled with microfine dust. The maximum depth is 2D - 1 meters and the pool has a diameter of 5D x 10 meters. It will take 4D minutes to find a safe ground passage around (double time in Rough and triple time in Mountain terrain). Travelling through the dust pool causes a 1/6 chance of a minor vehicle or Vacc Suit malfunction for every 50 meters of distance travelled.

Loose Rubble: Portions of the path ahead are strewn with loose rubble. Ground travel speed except for tracked vehicles is cut in half for the next 1D kilometers. On a roll of 11+ on 2D an avalanche will also occur.

Meteor Shower: Micrometeorites pelt the area for 2D seconds. If the shower lasts 7+ seconds there is a 1 in 6 chance that each character exposed will have a Vacc Suit breach. If the shower lasts 9+ seconds, there is a 1 in 6 chance that each vehicle exposed will be breached to vacuum. In a breached vehicle, roll Dexterity or under on 2D to repair the breach. If unsuccessful roll Dexterity or less on 2D (Die Modifier of Vacc Suit Skill) to don Vacc Suit in time to avoid 1D of decompression damage.

Rocky Ground: Rocky areas ahead add one-half to the travel time of characters on foot or in tracked vehicles. Double the travel time for other ground vehicles. The rocky area extends for 2D x 2 kilometers.

Vapor Vent: A small crack in the ground ahead is seen to spout vapor at irregular intervals. The crack can easily be leaped over by a character on foot. Ground vehicles can easily avoid the crack. Roll 2D if the characters elect to pass over the crack. On an 8+, the crack will spout vapor as they cross. Vehicles will receive a sharp jolt but no damage. A character on foot will be thrown into the ground. Roll Dexterity or under on 2D to avoid 1D Hit Points in damage. Check for a 2 in 6 chance of Vacc Suit breach also.

Space Encounters

Asteroid: An asteroid of at least $1D + 2$ times the size of the players' ship is on a rear/side/front collision course. Roll Maneuver capacity or less on 1D to avoid (Die Modifier: Pilot Skill). Failure to avoid means taking 1D Hits, as if from a Missile. (**High Guard:** Surface Explosion Damage Table with Die Modifier of +3.)

Comet: The ship passes near by a comet. Roll Ship's Maneuver capability or less on 1D (Die Modifier of Pilot Skill) to avoid hitting a chunk of debris. If unsuccessful, take one Hit as if from Laser Fire. (**High Guard:** Surface Explosion Damage Table with a Die Modifier of +4. Critical Hits become No Effect.) Ships scanner range is reduced by half for $2D + 4$ minutes due to dust and gases in the vicinity.

Debris: A chunk of debris is detected on the ship's scanner at a distance of $1D \times 10,000$ miles (double distance for Military Equipment). After 5 minutes study, roll 1D: 1 - 5: Natural debris; 6: Man-made debris.

Dust Cloud: The high density of dust in this region causes Laser Fire to be less powerful than usual. All Beam Weapons Factors are reduced by one for the next $1D \times 10$ minutes.

Ion Cloud: The presence of an ion cloud in this area causes Missile Fire to be less effective than usual. Each turn roll 2D: on a result of 5 or less, there is no change; on a result of 6, 7, 8, or 9, the Attacking Missile Factor is reduced by one; on a result of 10 or 11, the Attacking Missile Factor is reduced by two; on a 12, the entire Missile salvo detonates prematurely and does no damage.

Meteor Shower: A meteor shower occurs. $1D6$ meteors strike the ship. Roll to hit with Die Modifier of Pilot Skill. (**High Guard:** Attacking Beam Factor of 1 with Die Modifier of Pilot Skill. Penetration is against Sand Factor 2. Roll on Surface Explosion Table with Die Modifier of +1.)

Nebula: The high density of nebular material in this area causes misreadings on the sensors. Any communications are also interfered with for the next $1D \times 20$ minutes as detection range is cut in half.

Space Encounters Near a Black Hole

Electro Gravitic Disturbance: An extremely large amount of matter has just been sucked into the Black Hole. As it crosses the event horizon, a tremendous burst of static is given off and a gravity wave is created. In addition to the effects of the Electro Magnetic Disturbance, momentary surges in the ship's internal gravity field will cause the gravity to go up or down by .1 g. The Jump Drive is effected and characters with Engineering -1 or better will know that the chances of misjump are increased unless 1D hours are spent in recalibration. The misjump throw will have an additional Die Modifier of +4.

Electro Magnetic Disturbance: A fairly large amount of matter has just been sucked in the Black Hole. As it crosses the event horizon, a tremendous burst of static is given off. This static lasts $1D + 5$ minutes. During this period, the ship's scanning range is cut to one third normal and 1D spurious blips are picked up. Induction causes temporary current surges in the control circuits and breakers trip in at least one ship system. Roll 1D: 1: Power Plant; 2: Computer; 3: Maneuver Drive; 4: Jump Drive; 5: Weaponry; 6: Life Support. There is no damage and $1D \times 10$ seconds later the breaker can be reset to restore the system function.

Ramayan

Only one system of the Ramayan state is in this sector with the rest of the systems occupying the adjacent Coreward areas of the Maranatha-Alkahest Sector. The Ramayan are Humaniti with only small minorities of resident Aliens. Their policies emphasize trade but though neutralistic and non-belligerent, they are noted for an aggressive self defense.

Rim Nai

Five systems at the Spinward Rimeedge belong to the Rim Nai, a centralist Humaniti State whose principal extent is to Rimward. While highly aggressive, internal struggles have prevented Rim Nai expansion. Internal dissent has temporarily ceased and attempts at external expansion are anticipated.

Background Information

The Crucis Margin is located slightly Rimward from the center of the Trailing edge of the Imperium. This sector is one of the group of sectors of mixed Client States known collectively as the Gateway Quadrant. These smaller states separate the Imperium from the domains of the Hive Federation and the Two Thousands Worlds. The sector name is derived from the largest independent state in the sector, the Union Crucis.

Mandanin Co-Dominion

Sprawling across five subsectors in Crucis Margin, the Co-Dominion extends into the Spinward edge of the Glimmerdrift Reaches Sector, occupying portions of four subsectors there. This state is a cooperative arrangement between Humaniti and a significant Alien Minor Race, the Danin. Though association and trade activity had been high in this area for millenia, only recently did a tight political union form. Though generally of non-belligerent philosophy, the most recent history of the Co-Dominion has recorded attempts at military expansion.

Hv'ika Kamlin

The Hv'ika Kamlin is an independent state composed primarily of the members of an Alien Minor Race and a Minor Race of Humaniti. They are a Client State of the Hive Federation, greatly influenced by it and militarily allied. While active in commerce and political affairs, the predominant philosophy is not militarily aggressive.

Ramayan

Only one system of the Ramayan state is in this sector with the rest of the systems occupying the adjacent Coreward areas of the Maranatha-Alkakest Sector. The Ramayan are Humaniti with only small minorities of resident Aliens. Their policies emphasize trade but though neutralistic and non-belligerent, they are noted for an aggressive self defense.

Sphere Fenix

An acknowledged Client State of the Imperium, Sphere Fenix is composed primarily of Humaniti who were refugees from the Long Night. A long period of political and military turmoil preceded the present period of peace and stability. Traditionally maintaining large armed forces, the member planets of Sphere Fenix will hire out their regular units as Mercenaries. This state exerts a military and police presence for beyond her nominal borders.

Chhung Kuo

A small neutralist state composed of Humaniti with significant percentages of Alien Minor Races, Chhung Kuo is inward looking and emphasizes internal trade. External trade is not greatly stressed but relations with neighboring states are cordial. Military policy has never been expansionistic but adequate defense forces are maintained.

Union Crucis

Organized from diverse Humaniti and Alien Races, Union Crucis has always had a history of internal dissent. Internal factions have crystalized over the issue of external expansion by military means. Suo, Sliv, Cast, and Nar factions currently claim 27, 19, 28, and 15 systems expressing allegiance. An increasing degree of internal disturbance seems to be likely in the near future.

Rm Nai

Five systems at the Spinward Rimedge belong to the Rm Nai, a centralist Humaniti State whose principal extent is to Rimward. While highly aggressive, internal struggles have prevented Rm Nai expansion. Internal dissent has temporarily ceased and attempts at external expansion are anticipated.

Rill A879778 C

0234

An independent planet, Rill is the fourth in a system of eight. Three minor rocks orbit closer to the sun. An asteroid belt, a gas giant, and two more minor rocks complete the system. Settled several centuries by refugees from a system taken over by the Rim Nai, the populace is not wanting to be absorbed by that state again. Unfortunately the Mandanin are not popular either and no consensus has been achieved. Each of the major islands is a political entity unto itself and tends to bicker continuously with its neighbors. No one ever actually fights each other but a lot of continuous argument goes on. Sea products provide most of the food. Some mining goes on and a modest industrial base exists. A small Starship Yard subsists mainly on overhaul and repair contracts for the ships of surrounding independent systems. A small tourist industry is supported by "Big Game Fishermen". Some of the predator species in the Rill oceans are truly formidable. Some are even rumored to have glands whose secretion can be processed into an anagathic drug.

Guerzim B756759 B

1626

Settled and built-up as a Base two centuries ago, Guerzim participated in the Narman Strife. The planet served as the staging area for the forces which invaded and occupied Narok, Tamale, and Daboya. Only disorganized remnants survived to be evacuated back to Adrar and Guerzim. Reorganized as the planetary defense forces, these remnants were further decimated by the Mandanin counterattack. The refueling base on the third moon of the outer gas giant was destroyed as well as the moon itself split into four smaller fragments. The Naval Base on Guerzim, though well defended, was destroyed also. After the peace settlement, the devastated base was somewhat rebuilt to support the patrol forces maintained in the sector. The troops were mostly demobilized and settle on Guerzim. Socially they retained some of the aspects of the former military command structure resulting in a classification of feudal technocratic government. A small Scout Base is maintained here which also provides refueling for the extensive patrol forces still maintained in this region.

Six planets comprise this system. The innermost orbit is occupied by a 4900 km diameter rock which has a belt of six 100 km rocks in orbit about it arranged in a rosette. Scientists speculate that this is an Ancient Artifact but little work has been done in this area. Guerzim orbits second out, having a 1400 km diameter airless rock as a satellite. The third orbit out is a E310000 ... with two minor rocks as satellites. This planet served as a defense base during the Narman Strife but when destroyed was not rebuilt. Fourth orbit out is a small gas giant with 8 minor rocks as satellites. Fifth orbit out is a large gas giant which formerly had 10 satellites, minor rocks and ice balls. The third moon was an ice ball of 600 km diameter which housed a dug-in refueling station. The bombardment which destroyed the base also split the moon into four large fragments and numerous smaller ones. Its former position is occupied by a radioactive cloud of debris marked as a navigational hazard. The outer sixth orbital position is held by a 6700 km diameter rock which has a 4 km thick coat of frozen gases thus giving statistics of E401000 ...

Gijon C480204 9

3220

This planet is inhospitable to Human life and has little native life of its own. That life which it does have is all desert specialized. In the dense atmosphere, storms are frequent and fierce. A Mining Station exploits a large deposit of rare earth minerals and a few hardy prospectors seek out and work smaller deposits. Water is processed from hydrous minerals for life support purposes and for fuel manufacture. Deposits are playing out and some of the population has emigrated.

Twelve planets comprise this system, the innermost five being bare rocks of 2000 km diameter or less. Gijon is fifth and has one 1000 km diameter rock as a satellite. Sixth, seventh and eighth are larger rocks of about 3000 km diameter with several minor rocks for satellites. Ninth and tenth are gas giants with 21 minor rocks for satellites between them. Large numbers of ice asteroids orbit in the trailing trojan position of the ninth planet and tentative plans have been advanced to bombard Gijon with them to raise the Hydrographic Percentage. The last two positions are occupied by minor rocks with thin crusts of frozen gases.

Lonoke C8787A4 C

2133

One of the extreme Rimward frontier worlds of the Union Crucis, Lonoke is a steadily developing solid member of the Union. The 47 million population, primarily Humaniti, also includes 5 million Aliens. The planet derives a major portion of its food supply from its oceans. Not a great deal of land is available and much of that is deliberately left in forest. A major portion of the population is occupied in manufacturing. The primary industries are computer manufacture and construction equipment. Much of the construction equipment is used on planet for domestic buildings. Quick and frequent violent storms have caused most people to construct underground housing. Most of the fishing and transport fleets are comprised of Submarines to avoid weather danger at sea. A single family has provided most of the leadership during the history of the planet and the Autarch is still selected from among this family. The current Autarch, Krna Hmlanna, is well respected and she tends to intervene only when absolutely necessary. The elected members of the Autarch's Council do almost all of the routine governmental business. The military presence on Lonoke is slight, voluntary enlistment in the Reserve Planetary Guard is popular. Lonoke contributes an unusual percentage of volunteers for enlistment in the Union Space Navy. It is a member of Suo faction.

The planet is second in the system, the first planet being a minor rock. An Asteroid Belt, a minor rock, two gas giants and two more minor rocks complete the system. The Union Navy maintains a communications and refueling station on the second moon of the outer gas giant.

Shang Ti C67A839 C

2702

The third planet out in a system of ten, Shang Ti is a rapidly industrializing world. It has an unusually large population for a Waterworld of its type and has specialized in biologically produced industrial raw materials. In cooperation with several K'ree Herd/Corporations, extensive programs of development have been successful in finding ways of biologically developing complex metallo-organic synthesis intermediates on a cost-competitive basis. A traditionalist family/clan structure has provided a stable basis for an Oligarchic government. Inter-family feuds have caused considerable turmoil in the past, but strong repressive measures taken after an especially violent outbreak a century and a quarter ago have proved effective. The ruling council plans to continue its program of introducing more complex industry and technology to make Shang Ti a major industrial center of the Chhung Kuo.

The inner two planets of the system are minor rocks less than 2000 km in diameter and have no satellites. Shang Ti has one moon, 3400 km in diameter. The fourth and fifth are airless rocks 4500 and 5100 km in diameter with no satellites. The sixth orbital position is held by an Asteroid Belt. The seventh planet is a gas giant with six minor rocks as satellites. The eighth planet is a large gas giant with nine satellites, all but two of which are minor rocks. The two are significant worlds of 3900 and 5100 km diameter. The ninth and tenth planets are rocks of 5800 and 6200 km diameter with a crust of frozen gases.

Lubon C300246 9

2111

Mining is the primary reason for Lubon's existence though it serves secondary functions as a refueling stop on the border circuit. Large deposits of most major raw materials have been discovered. A consortium of companies on Katowich is financing development of this planet. Settlements have been started at three major deposit concentrations and the site for an extensive Spaceport surveyed. Roads have been established between the settlements, though it is later planned to build monorail connections. Manufacturing and population increases are planned to take place over the next century and a half.

The system comprises seven planets. The two inner planets are minor rocks of 2000 km diameter. The third orbital position is occupied by Lubon and its 500 km diameter satellite. Fourth is an Asteroid Belt. Fifth is a small gas giant with four minor rock satellites. Sixth and seventh are large gas giants with a total among them of 17 minor rock moons.

Negril C652593 A

0120

Somewhat of a backwater planet, the 9840 kilometer diameter world is the third in the system. Two smaller airless rocks occupy the inner orbits and have only automated communications beacons on them. An outer pair of gas giants complete the system. A small Mining Station is located on one of the moons of the larger gas giant. The primary products of Negril are the refined heavy metals mined here. Large quantities of special biological products are also shipped. Several popular spices are gathered from the Krasnaya species of forest shrub. It has not proved practical to cultivate this shrub so the product is obtained by gathering teams which rove on ATV's towing a processing trailer. Periodic Air Raft visits are made to collect the refined spices. The salt seas serve as a preserve or reservation for certain religious colonies of Danin which wander the shores living on large rafts. Other religious colonies live as herding Nomads on the extensive plains raising vast herds of Grazers. The seasonal ritualized confrontation between the Water Folk and the Herd People provides an occasion for trade and feasting as well as welcome entertainment to the Miners and Gatherers. Major civil administrators are appointed by the Co-Dominion Senate. Negril elects its Senator every five years and otherwise pays little attention to interstellar politics. The demand for its major products is stable. Society is quite conservative and tradition conscious. Military forces on the planet are few consisting of a courier or two and a refueling station. All citizens undergo a six month basic military training and then are transferred to the active reserve of the Planetary Defense Forces.

Uaboe C965669 A

0601

A relatively large sized World, with a planetary diameter of 19,000 kilometers and a planetary circumference of 59,660 kilometers. The atmosphere comes close to the standard rating, with a marginally higher oxygen content as the major difference. Approximately 50% of the planet surface is comprised of low salt 'ocean'. The land masses are thickly covered with jungle-like growth. Surprisingly, no sentient life forms were discovered by the Survey Vessels, so little time was wasted in establishing refineries to extract the vast Petroleum deposits. Large areas in each of the five Climate Zones have been set aside as preserves for the indigenous life. Small portions of these reserves are in use as resorts for travellers with a small amount of hunting permitted to the more influential guests.
