

SPACE HORROR LOCATION GENERATOR

by James Barton

© 2019

This d100 generator is a tool for wardens that inspires new adventures starting from an unusual location and its inhabitant(s). It was inspired by tables in Matt Finch's excellent *Tome of Adventure Design*, with this table adjusted to reflect the surreal sci-fi and horror elements present in *Mothership RPG*.

Ways to use:

- Roll a single d100 and read straight across: "Abandoned Ambush of the Absorbition A.I."
- Roll a d100 for each column and add them together to form an adventure location name.
- Choose randomly, or roll a single number planning to read diagonally through the columns

These results are deliberately unclear and require creative interpretation. Don't let grammar get in your way and feel free to alter as you work. A 'bone butcher' could just chop bones, be made of bones, or could be a new bone in your body that makes you want to butcher your friends.
