Mood Levels

The diagram illustrates a multi-scale feature fusion mechanism. It shows three input feature maps (d8, d6, d4) being processed through a series of operations to produce an output feature map. The diagram includes labels for 'OVERLOAD INDICATOR' and 'OVERLOAD THRESHOLD'.

Skills

The diagram shows a quantum circuit with 6 qubits. Each qubit line consists of three sequential gates: a diamond, a square, and a triangle. Solid horizontal lines connect the triangle gates to circles on the right, each containing a plus-minus symbol ($\pm$).

Sentiments

The diagram consists of three horizontal black lines. On the right side, there are two vertical dotted lines. The left vertical dotted line has three circles at the top, middle, and bottom, with the label 'At Risk' to its left. The right vertical dotted line has three circles at the top, middle, and bottom, with the label 'Lost' to its left.
