Fumbles and Mishaps

Determine Fumble

- Determine the difference between the attack roll and the defense roll (remember to roll for any penetration dice)
- Multiply this number by 10
- Add this number to a d1000 roll
- If the total is an **odd** number the defender gets an immediate free attack
- If the total is less than 200 you got a lucky break and nothing else happens. Otherwise consult the table below:

201 - 263	Hinderance	Page 6

Hindrance

201 - 263

201 - 216 Sweat in your eyes, -1 to hit for 10 seconds

217 - 232 Blook in your eyes, -3 to hit for 10 seconds

233 - 247 Nearby Ally is Automatically hit (by their opponent)

248 - 263 Distracted by ally or opponent, -4 to hit and no Dex bonus to AC for 10 seconds

Equipment Mishaps

264 - 398

- 264 - 276** Boot/footgear breaks, -1 to attacks and defense until repaired or discarded
- 277 - 318** Backpack, pouch or other container strap breaks, -1 to attack and defense until item repaired or discarded.
- 319 - 343** Belt, girdle, etc. breaks, -1 to attack and defense until item repaired or discarded
- 344 - 364** Armor loosened, -1 to attack and defense until readjusted (by redonning or by another person helping for 10 seconds)
- 365 - 370** Armor strap breaks, -2 to attack and defense until repaired
- 371 - 398** Shield strap breaks, -3 to attack and defense until repaired or discarded

Armor Damage

399 - 436

399 - 436 Damage own armor by 1 point

Your armor, no matter how solid and what quality (apart from magical armor) will eventually degrade if not cared for properly. We keep track of this by armor hit points – each type of armor has 10 hit points. Every damage penetration roll (once per penetration, double penetration does not double the armor damage) by an enemy against your PC in combat, critical hits suffered to an area covered by the armor, certain fumble results and even some spells will cause your armor to lose one hit point per occurrence. Once an armor loses all 10 of its hit points, it loses one DR. If it loses its hit points a second time, it loses another DR and so-on. The armor's encumbrance, defense penalties, speed penalties and soon remain, despite the lower DR. It is in fact possible for an armor to be reduced to zero DR, but the worthless junk is still attached to and hindering the poor schlep trying to wear it.

Luckily, damaged armor can be repaired. Such repairs take time and carry expense, but far less time and expense than having new armor made. One caveat, however, is that armor can only be repaired within its majority DR range. If you let your armor degrade so far that it drops to less than half its starting DR value, that armor can never economically be repaired to its full DR. In other words, it's totaled. For example, Myrtle the Fighter has Chainmail with DR 5. His armor suffers eighteen damage (thus carries DR 4). He can get it repaired when he reaches town and finds an appropriately skilled smith. But if on the way to town, he's ambushed and suffers eight more damage to his armor, his armor now has a DR of 3. He can still get the armor repaired, but such extensive work costs more than a new suit of armor and probably almost as much time.

Weapon Damaged/Broken

437 - 616

437 - 472 Handle Broken, -1 to hit

473 - 508 Blade/Head Broken, -1 to damage

509 - 517 Blade shattered (useless)

518 - 526 Handle/Haft sheared (useless)

527 - 535 Sheared (useless)

536 - 553 Handle Badly Broken, -2 to hit

554 - 571 Blade/head badly broken, -25% to damage

572 - 580 Blade/head sheared/cracked, -50% to damage

581 - 616 Edge dulled, nicked and/or cracked, -1 to attack
and -1 to damage

unbalanced

617 - 688

617 - 630 Overextended +d4 seconds penalty to next attack, -2 to next defense roll

631 - 644 Hinder a random, adjacent ally who suffers +d6 seconds penalty to next attack and -(d4+1) penalty on next attack roll or 25% chance of hitting you instead

645 - 658 Off balance +d4 seconds to next attack

659 - 672 Overextended, -2 to next defense roll

673 - 688 Slip, make check vs. $\frac{1}{2}$ dex or fall prone plus -6 to all defense and attack rolls for 10 seconds

Non-Weapon Injury to Self

(Sprains/Hyperextensions)

677 - 688

689 - 690	Left Big Toe	709 - 710	Right Wrist
691 - 692	Right Big Toe	711 - 712	Left Wrist
693 - 694	Left Foot	713 - 714	Right Shoulder
695 - 696	Right Foot	715 - 716	Left Shoulder
697 - 698	Right Ankle	717 - 718	Right Elbow
699 - 700	Left Ankle	719 - 720	Left Elbow
701 - 702	Right Knee	721 - 722	Neck
703 - 704	Left Knee	723 - 724	Back
705 - 706	Right Hip	725 - 726	Left Achilles
707 - 708	Left Hip	727 - 728	Right Achilles

1 in 6 sprains result in a muscle tear

Sprains/Hyperextension: These results impose a -1d3 Attack penalty. If the injury occurs to the lower body, an additional impediment (reducing movement by 50%) is applied.

Sprains require x d3 weeks to recover from (where X is the Attack penalty resulting from the injury). If $X > 1$, the character gets incrementally better as his injury heals. For example, if he suffered a -3 Attack penalty that required 6 weeks to heal, he drops to a -2 Attack penalty after $1/3$ the healing time [2 weeks]).

Muscle Tear: If a tear is indicated, healing time increases by 50%.

Non-Weapon Injury to Self

(Strains / Pulls)

729 - 774

729 - 730 Left Calf

731 - 732 Right Calf

733 - 735 Left Hamstring

736 - 738 Right Hamstring

739 - 740 Left Quadriceps

741 - 742 Right Quadriceps

743 - 744 Gluteus Max

745 - 746 Forearm

747 - 748 Bicep

749 - 751 Tricep

752 - 759 Lower Back

760 - 761 Side

762 - 766 Upper Back

767 - 768 Left Shoulder

769 - 770 Right Shoulder

771 Neck

772 - 773 Hip

774 Abs

1 in 6 strains result in a torn ligament or tendon

Strains/Pulls: These results impose a -1d4p Attack penalty. If the injury occurs to the lower body, an additional impediment (reducing movement by 50%) is applied. Sprains require $x \times 3$ weeks to recover from (where X is the Attack penalty resulting from the injury). If $X > 1$, the character gets incrementally better as his injury heals.

Torn Ligament/Tendon: These results require $2 \times x \times 3$ weeks to recover from. In addition, half of the penalties are permanent. *For example, Joe the Fighter suffers a torn ligament in his should resulting in a -4 Attack penalty. He rolls 8d3p getting 15 meaning that it takes 15 weeks to recover from his injury. Since half is permanent, his Attack penalty is reduced to -3 after 7.5 weeks and -2 after 15. The -2 is a permanent disability.*

Critical Hits

Determine Severity

- Determine the difference between the attack roll and the defense roll (remember to roll for any penetration dice)
- Roll damage normally
- Add these two numbers together, this is the **Wound Severity**.

Determine Location

- Roll d10,000 and adjust for size according to the following chart

Critical Hit Location Size Adjustments

		Attacker Size					
		T	S	M	L	H	G
Defender Size	T	d10,000	d9,000+1,000	d8,000+2,000	d7,000+3,000	d6,000+4,000	d5,000+5,000
	S	d9,000	d10,000	d9,000+1,000	d8,000+2,000	d7,000+3,000	d6,000+4,000
	M	d8,000	d9,000	d10,000	d9,000+1,000	d8,000+2,000	d7,000+3,000
	L	d7,000	d8,000	d9,000	d10,000	d9,000+1,000	d8,000+2,000
	H	d6,000	d7,000	d8,000	d9,000	d10,000	d9,000+1,000
	G	d5,000	d6,000	d7,000	d8,000	d9,000	d10,000

Note that the above does not apply if the smaller character can fly or otherwise has access to the upper parts of the larger creature (on a ledge for example). In these cases you will need to eliminate or lessen the modifier. Finally, the above table does not apply to missile weapons.

The image features a parchment-like background with a decorative title 'HackMaster' at the top. The title is rendered in a stylized, red, serif font with a yellow outline, set against a dark, ornate banner. The banner is decorated with green foliage and a central shield containing a checkered pattern and a sword. The entire scene is splattered with numerous red blood droplets of varying sizes, with larger, more detailed splatters on the left and bottom right sides.
