

PURPLE PLANET BOOK OF HANDOUTS

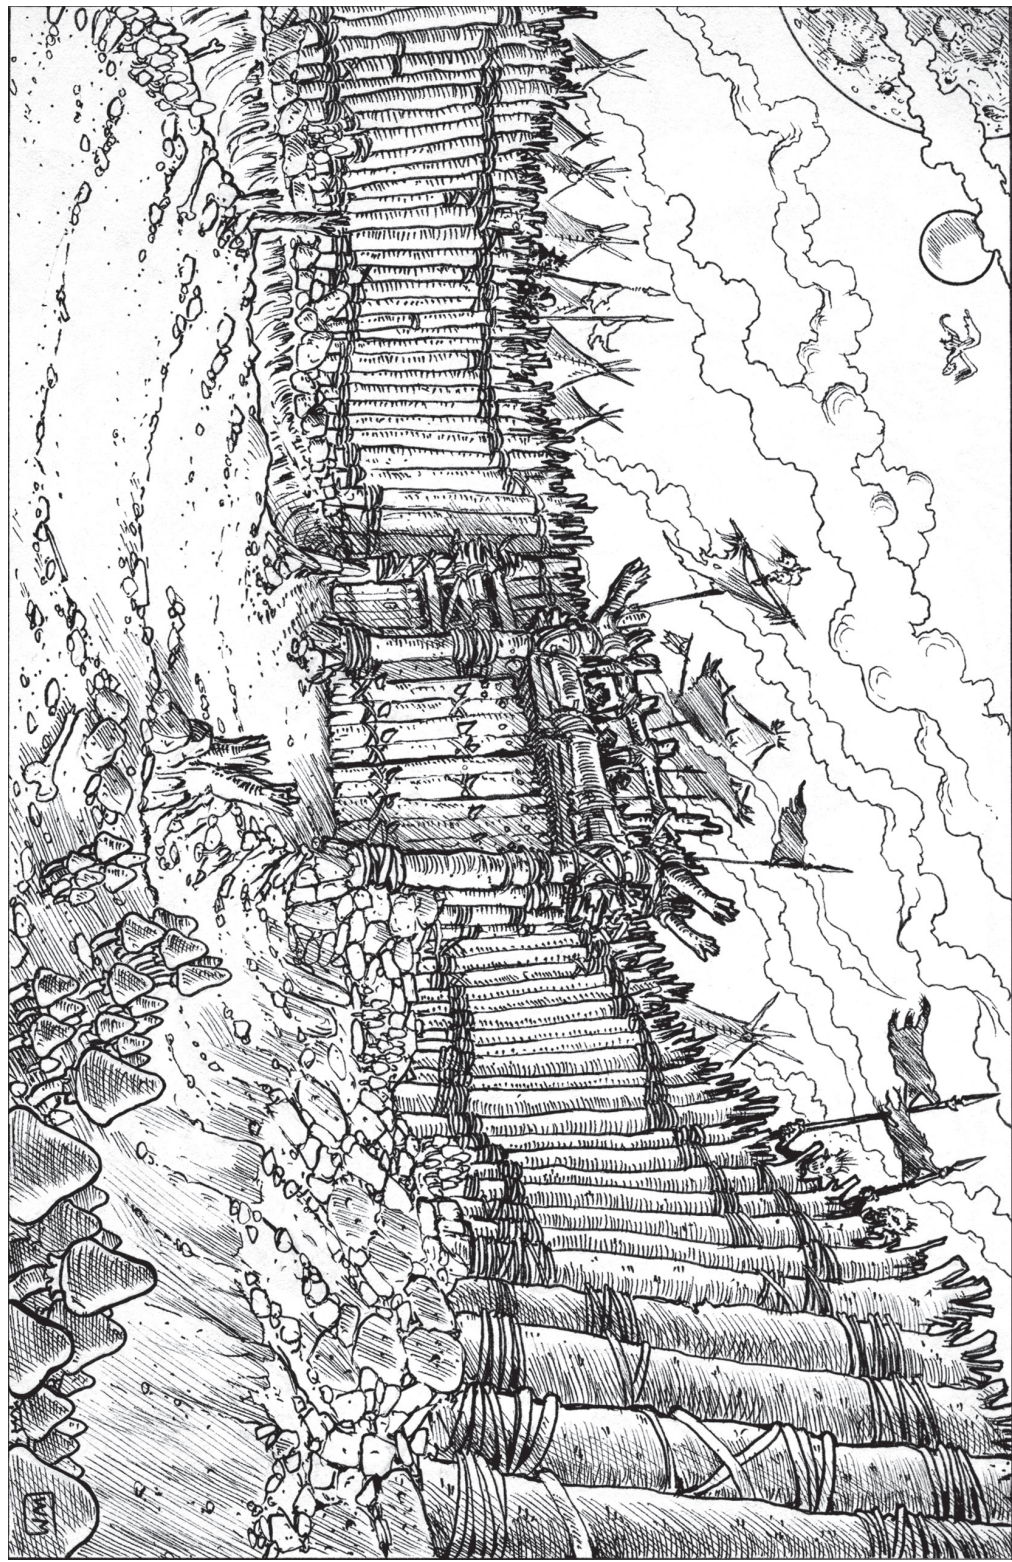

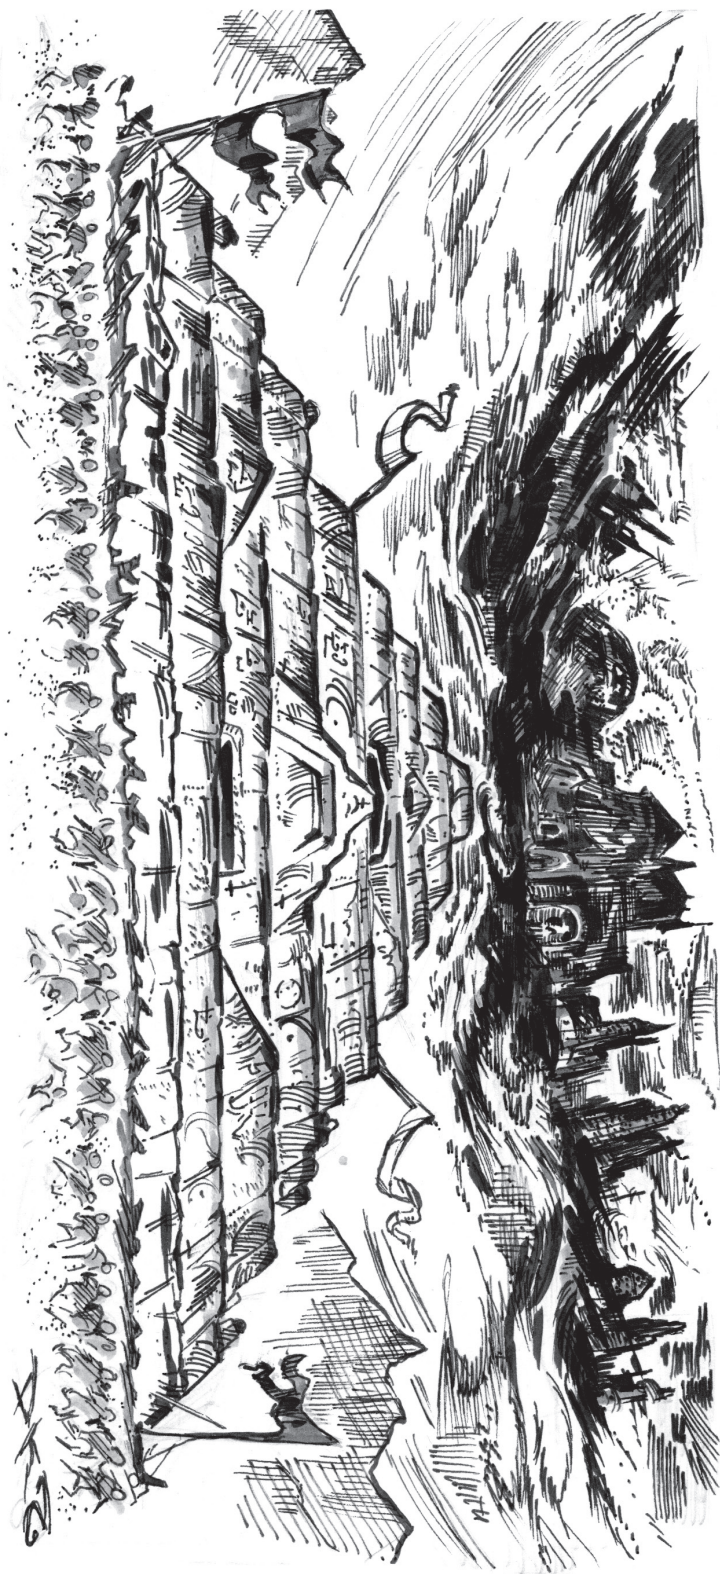

elcome to the Purple Planet! This book of handouts is designed to supplement the materials shown in *DCC #84: Peril on the Purple Planet*. The Purple Planet is a vast place with many locations to explore, and this book of handouts cannot cover them all. We have elected to include locations that the PCs are most likely to encounter, along with some visually exciting places they should encounter once you see how cool the handouts are!

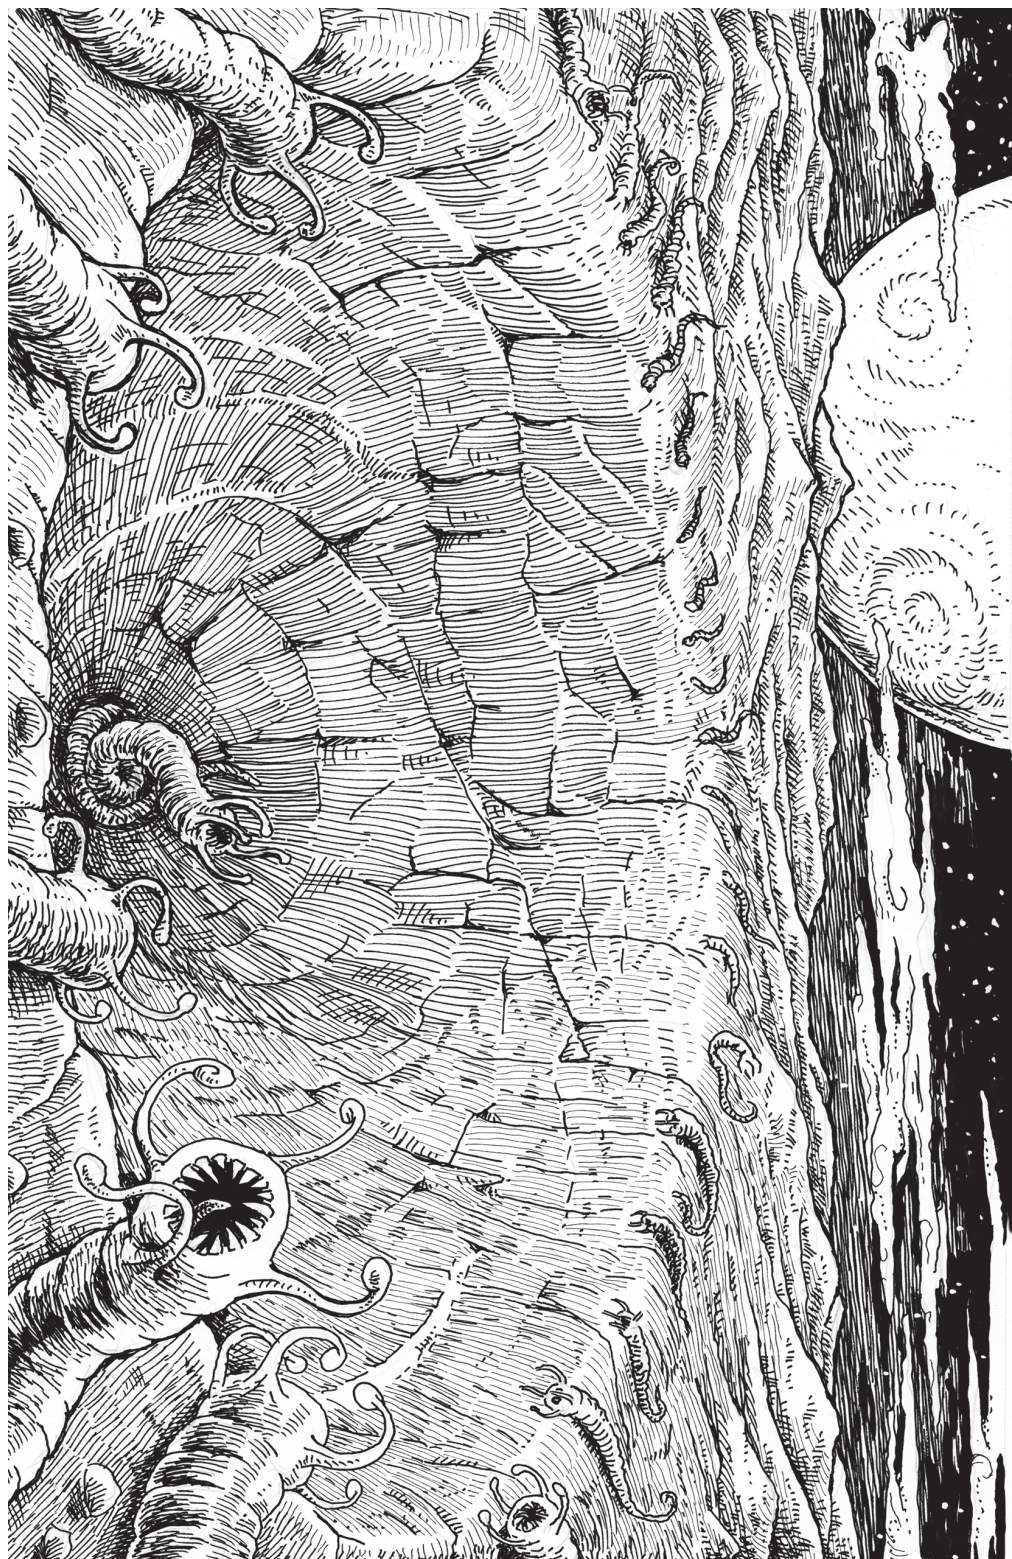

The table below shows all handouts within this project, and where they are located. Note: The pages in this booklet are not numbered, because every page is intended to be photocopied for players. But this booklet is short and you should be able to easily identify page numbers to match back to the table below.
