

DIE-DROP HIT CHART FOR LOCALIZED ATTACKS

INSTRUCTIONS:

Take 1d20 and throw it on this chart. Wherever the die falls is the body area that's being attacked. If the area is protected by armor, use the AC value of the armor. If it's not covered by any armor, count it as UNARMORED. If the hit lands, roll for DMG, and subtract as many HP from the character as indicated by the die.

You may enhance the attack description by mentioning the specific area affected by the attack.

A critical 20 would mean that the body part has been mutilated, or otherwise heavily disfigured.
