MUTATION CHARTS

- (D) indicates a mutation that is either a physical or mental defect.
- (A) indicates an animal mutation that applies to creatures only. Humanoid mutants must re-roll an animal mutation result.
- For each die of radiation damage there is a 1% chance of mutation.
- Mutants roll a d4 once for the number of physical mutations and once for the number of mental mutations they start with.
- For mutants, roll for one physical or mental defect. If they have 5 or more total mutations roll for both a physical and a mental defect.

ITEM COMPREHENSION

- Cross-reference the Mental Resistance against the Item Complexity Level. A percentile roll equal to or greater than the number listed means the item has been comprehended.
- A comprehension check should be made once per week until the use of the item is deciphered.
- True Humans receive +1 to any die roll to comprehend technological devices.
- A failed comprehension roll can cause fatal injuries to the handler or those nearby. Roll the percentile dice twice on the **Chance of Injury** table for **Injure Self** and **Injure Others**. If injury occurs, there is a 10% chance of immediate fatality by Danger Category level.

COMBAT ROUND

A combat turn is 10 seconds. The actions for the round are; one move and one attack, one mental attack, or a charge.

COMBAT SEQUENCE

1. Determine initiative order. Order is based on the highest Dexterity. The referee rolls 3d6 to determine a creature's Dexterity and rolls off any ties.
2. Determine if there is surprise. A Dexterity of 4 higher than the surpirer negates surprise.
3. Each combatant makes a combat action in initiative order.
4. Repeat step 3 until combat ends.

MELEE COMBAT

1. Compare the Weapon Class of the attacker to the Armor Class of the target on the **Hit or Miss Chart**. Roll a d20.
2. A d20 roll equal to or higher than the target number on the **Hit or Miss Chart** results in a hit. Roll for damage.
3. Cross reference the race of the target (Humanoid Beings/ Mutated Creatures/True Humans) to the weapon on the **Weapon Damage Chart** and roll the indicated die.
4. Adjust striking damage by the character's Strength modifier.

RANGED COMBAT

- There are two systems for adjudicating ranged attacks: the regular d20 method or the alternate d6 method.
- The alternate **Hit or Miss Chart for Bows** below shows the minimum 2d6 roll needed for short/medium/long range.

MENTAL ATTACKS

- For every 5 aggressive mental attacks a being survives and resists successfully, their Mental Resistance goes up 1 point to a maximum 18. However, the power of mental attacks always uses the original unadjusted Mental Resistance ability score.
- A Mental Resistance of 12 is required to have more than 1 mental mutation.
- Any being or mutation without a stated Mental Resistance has a Mental Resistance of 3.

3 - 6

Creature must close first.

* A creature that must close the distance will lose surprise.

SURPRISE

Surprise gives the winning group 1 free combat turn which may include; moving or fleeing, mentally attacking, or engaging in physical combat.

• If the possibility of surprise exists, roll a d6. On a roll of 1 or 2 the group is surprised.

• A Dexterity of 4 higher than the surpiser negates surprise.

PURSUIT

If the group flees and a corner is turned, a door is passed through, or an inclined plane is taken, roll a d6. The creature will only follow on a roll of 1 or 2.

Roll 3d6 to hit. The die roll result determines the damage:

MINIMUM: Rolling the minimum number does 5d6 damage.

RANGE: Any other roll in the listed range does 15d6 damage.

HIGHER: Rolling higher than the range does 20d6 damage.

A d6 roll determines where the attack hits: 1 - head, 2 - right arm, 3 - left arm, 4 - right leg, 5 - left leg, 6 - body.

RADIATION EXPOSURE

- A number is the amount of d6 of damage after 1 combat turn. For every additional round of exposure roll for damage and treat the Radiation Resistance as minus 1 point.
- Radiation damage carries a chance of mutation. For each die of damage, there is a 1% chance. The mutation manifests itself in one week.
- True Humans who become mutated lose their Leadership Potential and all followers.
- D represents instant death after a round. There is a 20% chance that a character or creature is mutated instead of dying. The referee randomly rolls a 50/50 chance of mental or physical mutation and then rolls on entire chart of mutations, including defects.

POISON CONTACT

- A number is the amount of d6 rolled to determine poison damage.
- A result marked with an asterisk means the poison has no effect.
- D means automatic death. If an antidote is taken within 2 combat turns the poison only does a single d6 of damage.
