POMPOUS TITLE GENERATOR

This generator can be used by the GameMaster to create the sort of overblown title that is used by some rulers, quite often without any justification. Often, the less validity there is for it, the more pompous the title. Rather than simply having the title of "King" or "Queen", these rulers feel a need to pad out their titles and impress just how important they are on their subjects.

HOW TO USE THE TABLES

There are four tables in all. Roll on the tables, adding in filler words as required to tie the results together, such as "the," "of," "his" and "her"; these may be at the beginning of the title as well as within it.

To create a title, it is suggested to roll on at least Tables 1 and either 1 or 3 as a minimum. Here's an example from rolling on these tables:

Table 1

"Divine"

COMPATIBILITY

This product is designed to be system agnostic and usable with any pen and paper fantasy role playing game system.

Table 4

"Autocrat"

This gives a result, adding in filler words, of *The Divine Autocrat*.

To create a more pompous title roll on Table 1 followed by Table 2 then Table 1 again followed by Tables 3 and 4. Here's an example from rolling on these tables:

Table 1

"Inexorable"

Table 2

"Omnipotence"

Table 1

"Sagacious"

Table 3

"Majesty"

Table 4

"the Stars"

This gives a result, after adding in filler words, of *His Inexorable Omnipotence, the Sagacious Majesty of the Stars*.

This process can be repeated if desired, to create a truly pompous string of titles, perhaps altering the order in which the results are used as well. If a result doesn't seem to make any sense, reroll it until one that does is achieved. As an alternative, simply pick desired words from the tables rather than rolling randomly. The result from Table 4, the final table, can also be replaced with specific countries, places and locations from a GM's own campaign. Examples from the real world would be "of Africa" or "of the Atlantic."

With the number of different words on the different tables, and with it being possible to use some of the tables multiple times in the same title, a vast range of titles can be generated from them.
