FOREWORD

This document is designed to be an aid for players and referees alike. Naming is important in any culture, and even in our fantasy we like consistency; how many times while adventuring have you encountered an NPC with your character's first name or last name?

Why use real world names for a fantasy campaign? Cultural familiarity: If your character journeyed to England and met a man named Pierre whom your Game Master described as having a thick accent, you'd be inclined to think he was an immigrant. But if your character met Pandrolo in Follam (and if you knew little or nothing of the local culture other than you're adventuring there) and he had a thick accent, you might be misled into thinking that all the people in Follam spoke Common poorly or that poor Pandrolo had a low intelligence score.

This also means that if you need a spy, the PCs might learn that "Peter Adams" is really "Pierre Amonett". Additionally, some non-English names and surnames do appear in these tables, to add a foreign spice to the generation (Thomas Kruger could be generated, indicating a distant link to a Germanic culture; in the Terra Ferax Campaign that's Huthigard).

A second good reason to use real world names is that there are so many. In the English Tables, I have more than 2700 female names, more than 3600 male names, more than 7800 surnames (not including an excess of 1700 place names) and more than 800 nicknames for each gender. **Player Characters need roll on these tables, although they might want to look at or roll on them at their discretion. PCs need accept a name or nickname just because the dice rolled it.**

Some nicknames are not positive and are used to imitate nicknames in society. Use at your own discretion and disregard any you find offensive.

Barbarians are apart from society, so maybe you want Wulfric the Barbarian in a Germanic area or maybe you want to make up Ugabooga as your barbarian; if you're a barbarian, your name is not likely to fit society anyway, so go ahead.

Wizards, Sorcerers and Druids are notable exceptions. Who questions that Merlin doesn't have a surname? Who cares? By the same token, Harry Houdini was born Eric Weiss, and he made his new Surname his Wizard name.

History also gives us identifiers (as in "of place name") and nicknames as parts of names. Throughout the middle ages an identifier/nickname was tied not only to kings, but to various members of the nobility in many European countries at various times.

History is not the only place where these identifiers and nicknames occur. In the Arthurian Legends we have Lancelot du Lac (of the lake) and Morgan le Fay. Tolkien gave us Gandalf the Gray. If our own legends and fiction support such, there's room for it in our game play.

In the real world nicknames are given to everyday people, often for a single incident and there's no reason for this not to occur in a fantasy world. A smith might be called "the stupid" for a single event where he tried to cut costs by gluing and not nailing horseshoes to a horse, for instance. Alternately, he might be called "the miser".

English names are ideal for Isedlund, Gilmere, Ralwhel and the Principality of Follam on Terra Ferax.

DICE ROLLING

In this document, d00 indicates using percentile dice (a pair of ten-sided dice) rolled to produce a number from 1-100. One die is designated as the "tens spot", while the other is the "ones spot"; a pair of 0s (00) indicates a 100 was rolled.

No dice? No Problem! There are many Java-based die rollers (Java works with Sun-OS, Linux, Mac, Pc, etc.) on the web; the one at Irony games is excellent: <http://irony.com/igroll.html>

INSTRUCTIONS

Decide on the gender of the person you're generating a name for. Roll (or choose) from the name configuration table. If a Middle name is indicated, roll (or choose) an additional time from the First name tables.

NOTES ON NAMES

These names are a collection of Celtic, English, some French and Germanic, and a few mythological names from the British Isles. I ran across the name Rohn, and thought, "How... odd" until I realized we have Jon and John and that some one had applied the same "linguistic rule" to the name Ron. Some names may just seem strange so rename them (Ronald or Rohan are acceptable substitutes for Rohn). Some names you may not be comfortable with in a Medieval setting (Boomer, Dallas) – so just ignore them if you do not like them. Dallas, by the way, is a Celtic name meaning wise. Boomer is a family name (some claim it began as Bulmer) which occasionally crossed over as a given name. With as many names as are available in these tables, just thumb down to the next acceptable name if you have a problem with any of them.

SURNAMES

Most surnames are patronymic (they come from the father); some are nicknames ('Bigge' indicating a large person), some were occupational (e.g. Smith) and some are locative ('of Sudbury').

Locative placenames are extremely rare and generally indicate a person who is not from the local area. Simon of Sudbury, the Archbishop of Canterbury (?-1381) was known as being from Sudbury because he wasn't a native of Canterbury. In Sudbury, he would be just another Simon, but in Canterbury, he was likely the only Simon from Sudbury. Until 1400 A.D. in England an *of [place name]* was accepted (as in John of Gaunt; yes there are cases of 'de' rather than 'of' in English due to the Norman Invasion, but there were 'ofs' even during the Norman reign. The Plantagenets in England lasted until 1399; at the Holy See of York there was Geoffrey of Ludham, 1258; William of Wickwaine, 1279; Henry of Newark, 1298; and Thomas of Corbridge, 1300; – this information was collected from <http://www.newadvent.org/cathen/15733b.htm>). Approximately after 1400 A.D. the 'of' was dropped and only the placename was used. My recommendation is to use an 'of' for all English surnames derived from places regardless of date, but that's up to you and your campaign style.

For random determination, there is only a 5% chance (1-5 on percentile dice) of having a placename surname (see the next table), otherwise roll (or select) below on the English Surnames table (page 116).

PLACES AS SURNAMES

In the Terra Ferax campaign, each map guide has a "Where Do I Come From" section, which will allow you to localize to that specific campaign map. The table below assumes you are using historic England as a background.

The following list provides some of the current places in England, many of which were in existence in the Middle Ages (London, Bath, Canterbury, Kent, York, etc.). However, verifying that each and every one of these places was indeed in existence in the Middle Ages is beyond the scope this work.

Known Gods of Terra Ferax

Terra Ferax features 148 gods and a lot of overlapping deities. When looking at real polytheistic religions, divine overlap is common. Is Oceanus or Poseidon *the* Greek sea god? Is Athena or Ares *the* Greek war deity? Is Anubis or Osiris *the* Egyptian god of the dead? Is Isis or Thoth *the* deity of magic? Is Brigid or Dian Cecht *the* Celtic deity of healing? Is Freyr, Freyja, Frigga or Gefjon *the* Norse fertility deity? The answer to all these questions is that they all have that function. Our ancestors saw the world in a bipolar division of good and evil; imagine the pantheons that would have sprung from a paradigm of nine alignments.

Many of the deities listed herein have rivalries with deities who rival their sphere of influence, while others do not. If you're playing a cleric, no doubt the domains "seal the deal" for your decision as to which deity your character chooses. Other players should look at the deity's worshippers section to see if the gods' worshippers fit with their character's concept.

The gods are detailed by alignment, which follows this alphabetical listing.
