

PHOENIX COMMAND

Advanced Damage Tables For Small Arms

LEADING EDGE

INTRODUCTION

The **Advanced Damage Tables Supplement** has been designed for use with the **Phoenix Command Combat System** from Leading Edge Games. It expands on the Hit Location and Damage Tables from that system, giving the player greater realism without any loss of playability.

The Hit Location Tables provide greater detail than the original, with the addition of Tables for shots from the Side, the Rear, and from Oblique angles. Included in these Tables are 25 new Hit Locations. Also, each Hit Location now has its own Damage Table, which shows the path of the bullet through the target area. The bones, organs, and tissue which make up the area are given, allowing the player the grisly satisfaction of knowing exactly what the bullet did.

Another special attribute of the Damage Tables is that Penetration is given in 1/10 point steps. This gives the Tables the ability to accurately represent damage from low-penetration weapons, such as small caliber pistols and shotguns firing birdshot. The Hit Location and Damage Tables provided in **Phoenix Command** itself are designed for powerful military weapons; now the low-caliber weapons more common to civilian use can be accurately simulated.

This is the second edition of the Advanced Damage Tables, and it features a few changes. The most obvious is the improved layout and legibility of the Damage Tables themselves, but additional rules and data for Shock Damage and the effects of bullets Glancing Off Bone are also included here for the first time.

ADVANCED DAMAGE TABLES

This is a detailed expansion of the **Hit Location and Damage Table (6)** found in the **Phoenix Command Small Arms Combat System**, with hit locations for **Front**, **Rear**, **Oblique**, and **Side** profiles. Damage is consistent with the condensed data of **Table 6**, but has been enhanced to show the actual bullet path within each hit location. Penetration values are in tenth points, giving greater resolution and allowing **Disabling Injuries** and **Shock Damage** to be more accurately portrayed.

As in the original system, **Physical Damage** is determined by the bullet's penetration into a specific body location. This supplement contains over 60 specific hit locations, some of which are shown in **Figure 1**. This method assesses damage much more heavily when a vital area such as the heart is hit rather than a less vital area like a limb. Coincidentally, this means that no "critical hit" table is necessary and the chance of death is much greater from one major wound than many minor ones.

1.1

HIT LOCATION

"The richer you are, the cheaper life becomes."

Norman Steels

Whenever a person has been hit by small arms fire, the first step in determining the **Physical Damage** inflicted is to find the specific **Hit Location**. This is done by referring to the **Hit Location Tables** starting on the sixth page of this supplement. There are three pages of **Hit Location Tables**. The first is used for a person hit from the **Front** or **Rear**, the second for a hit from an **Oblique** angle, and the third for a hit from the **Side**.

Whenever a target is hit, refer to the proper table and find the appropriate target exposure in the first three columns. This target exposure depends on the target's posture and is given for the target **Looking Over** blocking cover, **Firing Over** blocking cover, and **In the Open**. Refer to the appropriate column and roll a 00-99 (or 000-999) random number. Find the line with the number rolled and read off the **Hit Location and Damage Table Number(s)** to the right. This gives the bullet's **Hit Location** and the number of the detailed **Damage Table** which will determine the **Physical Damage**. For limb locations, the left hit location numbers indicate a hit into the left limb, while a roll onto the right hit location numbers indicates a hit into the right limb.

Note that some **Damage Table** entries have two **Damage Table Numbers** listed. This indicates that the bullet strikes the first (left) location first, and, if it penetrates, continues on to strike the second location.

Examples:

A target **Firing Over** blocking cover is hit from the **Front**. A 62 is rolled, indicating a hit into the left **Shoulder**, **Damage Table Number 9**.

A target **In the Open** is hit from an **Oblique** angle. A 125 is rolled, indicating a hit into the **Arm Flesh** of the arm closest to the shooter, and the **Lung**, **Damage Table Numbers 11 and 19**. The bullet strikes the **Arm** that is nearest the shooter, and if it overpenetrates, it also strikes the target in the **lung**.

1.2

REAR HIT LOCATIONS

The Damage Tables have been designed to handle hits from the target's front, but can be used for hits from the rear. For hits from the rear, subtract the Shot's EPEN from the table's far right hand EPEN entry. Enter the table with this number and read off the damage from the appropriate Damage Class line. Now subtract the damage just found from the far right hand PD entry (same DC Line). This gives the actual damage done from a shot striking the target's rear and penetrating forward.

Example:

A target is hit from the rear in the Neck - Throat - Spine Table 6 by a shot whose EPEN = 1.4 and DC = 3. Table 6 is entered with an EPEN of 3.3 (far right entry) - 1.4 = 1.9. The PD for DC = 3 is 21H. The actual PD inflicted is 29H (far right entry) - 21H = 8H PD.

1.3

GLANCING OFF BONE

The Damage Tables of this supplement are ideal for determining the damage inflicted by low penetration weapons such as shrapnel and birdshot. They are the result of detailed computer modeling of the human body. Examining them you will find that when a bullet hits bone, the EPEN required for further penetration increases dramatically. This accounts for the bone deflecting under the impact, as the bullet both penetrates and deforms it. If the impact is great enough, the bone will shatter under the load and the bullet will continue. The Damage Tables model such impacts and account for the bone fragments and additional damage following bone fracture.

A bullet hitting bone with insufficient impact to penetrate will either deflect off the bone or become lodged. The basic tables assume that the bullet becomes lodged. To account for bullet deflection within the body requires statistical modeling of the deflection path and the inclusion of more tables than can be reasonably included in this supplement. To approximate this effect for limb bones and ribs, the following rules may be used.

Limb Bones

When a bullet hits a limb bone with EPEN less than required to fully penetrate it, there is an 80% chance it will be deflected off the bone. If it is, find the penetration depth against the bone normally and determine the excess EPEN over the EPEN for that column. As an example, look at Table 36, an EPEN of 3.2 would penetrate to the EPEN 2.3 column and have $3.2 - 2.3 = 1.1$ EPEN left. To account for bullet deflection off the bone and through the leg take this 1.1 EPEN and go to the corresponding Flesh Hit Location Table (in this case, Table 35) and enter with this EPEN. Add the corresponding damage to that inflicted on the bone table for Total PD. Here, $14 + 27 = 41$ PD for a DC = 3.

Ribs

When a projectile whose EPEN is under 1.1 hits a Rib, it will partially deflect off the rib and continue into the target rather than lodge. To model this, roll a 0-9 number and multiply by .05. Add this number to the bullet's EPEN and enter the table to determine damage normally. This correction factor accounts for the bullet deflecting off the rib and continuing into the target. Note that on such a hit, no Shock Damage should be applied as the bone has not been broken.

Example: A target hit in the Rib - Liver (Table 22) by a bullet with EPEN = .9 and DC = 2 would take damage as from an EPEN = .9 plus 0-9 roll times .05. If a 6 were rolled, the EPEN would be $.9 + 6 \times .05 = .9 + .3 = 1.2$. The PD done would be 53 points.

"Don't think of it
as Murder. Think
of it as Involuntary
Euthanasia."

Gil the Treacherous

PHOENIX COMMAND

Advanced Damage Tables For Small Arms

This **Advanced Damage Tables Supplement** is an ideal companion to the **Phoenix Command Combat System**, and provides a detailed, graphic expansion of the **Hit Location and Damage Tables**. In addition to Physical Damage, this supplement shows the actual bullet path through flesh, bones, and organs. Over 60 detailed Hit Locations are presented, covering shots from the Front, Side, and Rear, and from Oblique angles. In addition to these improvements in the Hit Location and Damage Tables, this supplement also includes other important features:

Low Penetration Weapons: The expanded Tables accurately show the effects of Low Penetration weapons, like under-powered pistols and Shot-guns firing Bird Shot.

Shock: Some wounds are more painful than they are lethal. This supplement accurately presents the effects of pain and Shock, as opposed to Physical Damage.

Glancing Off Bone: When a bullet hits a Bone, it will sometimes bounce off and continue through vital tissue, rather than expending its energy breaking the Bone. This is taken into account for the first time in this supplement.

The **Advanced Damage Tables Supplement** is an optional rules set designed for use with other **Leading Edge** products, including the **Phoenix Command Combat System** and the **Living Steel™ Adventure Game**.

The Revolution in Game Design continues!
