Fold the box so that the foot graphics are on the inside and glue flaps A and B together flush; then glue the box to the inside of the legs of the main body, providing a support structure on the inside.

1: Note which lines are marked for folding and which are marked for cutting.

2: Cut out the cannons around the outside lines (and the marked internal lines) and fold where indicated.

3: Glue all flaps marked “A” to the inside of the adjacent parts.

4: Insert the flaps marked “B” into the slots on the main body; fold the flaps against the inside of the main body and attach with glue or tape (upper flap upwards and lower flap downwards for best results).
