

The diagram illustrates a 'Settled Star System'. At the top left, a red star is shown with a green planet in orbit around it. To the right of the star, the text 'Settled Star System' is displayed. Below the star, there are two icons: a green circle with a white dot in the center, labeled 'Space Station / Human Outpost', and a brown circle with a white dot in the center, labeled 'Uninhabited Star System'. A horizontal line separates these labels from the orbital paths below. The orbital paths are represented by colored lines with a small circle at the end, each labeled with a number in a box: a red line labeled '02' for 'Main Route (Stellar Communication Network)', a yellow line labeled '02' for 'Secondary Route', and a blue line labeled '02' for 'Dead-end Route'.
