Master Spell List

This is a quick-reference table for all the spells published in the *NAGEE* so far. It will be expanded to keep it up-to-date with each new issue containing spells.

Legend

Name: the name of the spell.

Type: whether the spell is Mana or Physical.

Target: the target number used for casting the spell. If “(R)” appears after the target number, the spell is resisted by the target. “OR” refers to the Object Resistance rating of the target, while a number in square brackets [] following the “OR” notation indicates the typical target number (at the gamemaster’s discretion). “DS” refers to the Detection Spell Target Number table on page 192 of *SR3*; again, a number between square brackets [] shows the typical target number.

Duration: Instant, Sustained, or Permanent. The latter has the time it must be sustained in brackets after it—e.g. Permanent (10 turns). If there is no sustaining time given, such as for spells with a variable Drain Level, check *SR3* page 178 instead.

Range: the range at which the spell operates: Touch, Line Of Sight (LOS), or Self. An “(A)” notation after the range indicates it is an area-effect or area sense spell, while “(E)” indicates an extended area or extended sense spell; for Detection spells, there is a further indication: if the letter “D” appears in the notation, the spell is directional.

Drain: the Drain caused by casting the spell.

Source: shows where the spell’s full description can be found.
