

Gazetteer

Referee Edition

Terran Dawn

Sturn Webb

REFEREE GAZETTEER

This document contains both a map and Universal World Profiles for the Solomani Rim (aka Terran Rim) towards the end of the Long Night.

Many worlds of the Terran Rim have lost contact with the interstellar states that arose during the Long Night. Thus, their "social" profiles (starport, population, government, law, tech level) will not be common knowledge. Thus, two sets of the sector map and UWPs are available – one for players and one for referees. This document contains the referee version which fills in the blanks and makes corrections to the player's version.

No Claim to Canony

Nothing here is meant to be Traveller "canon". That being said, every known source on this campaign period has been researched so as to not contradict anything in the Official Traveller Universe created by Marc Miller and others. This document should not be considered "OTU" at all. That's for Marc and official Traveller publications to determine, not this home-made project.

Terran Dawn

Sectors, Domains, and the "Terran" Rim

The Rim Province was a 1st Imperium (Ziru Sirka) frontier province with a capital at Dingir. During the 2nd Imperium (Rule of Man), it retained the Rim Province name and encompassed approximately the same area that was the original Terran Confederation. This area comprised more than one Sector. While the borders of Provinces would die with the Rule of Man, they would eventually be replaced by the Domains of the 3rd Imperium.

The Solomani Rim sector, the core of the Rim Province, was originally known as just the Rim or the Rim Sector. During the Rule of Man, the title further changed to the Terran Rim. When the term "Solomani" became more common early in the 3rd Imperium, the Sector became known as the Solomani Rim.

UWPs for Referees

The UWPs listed below are the full, correct UWPs for all worlds. Players should resist looking at this document for risk of ruining the mystery and thus excitement of discovery. This document is for referees only. A player version is also available.

Where are the Subsectors?

Subsectors did exist during the 2nd Imperium which predates Terran Dawn. But, their use became less important during the Long Night after the fall of the Rim Province's government. Subsector borders fell into disuse as new borders arose. Pocket Guides will have their own smaller scale maps of varying size, but typically covering approximately 1-2 standard Subsectors.

Key

Hex: Hex location on the Terran Rim map.

Name: Name of the world during the era of Terran Dawn. Note that only known large population worlds are labeled on the sector map. Regional maps available in pocket campaign guides are more detailed with all worlds named.

UWP:Starport Size/Atm/Hydro Pop/Gov/Law – TL. UWPs in *italics* represent profiles that are different then those listed in the player UWPs.

Allegiance: Interstellar nation the world belongs to, if any.

Trade Codes: This column is currently blank for several reasons. Foremost, trade codes vary by rule set so space is left to allow a referee to fill in their chosen trade codes. The most recent versions of Traveller, "Mongoose" and "T5" can not yet be displayed. This author's interpretation of Mongoose's rules don't allow for display of trade codes. T5's rules are still evolving.

Bases: Naval, Scout, and Way. *Naval Base* represents a large military naval base operated by the entity in the Region code. A *Scout Base* is smaller then a naval base and administers scout craft and/or frontier craft for the entity in the Region code. A *Way Station* is just a fuel stop. It could be operated by a government, corporation, or independent entrepreneur. Way Stations are thus slightly different then the future 3rd Imperium variety since X-boat routes do not yet exist. A *Cache* is a normally secretive military storage base.

Sources: A list of sources for a referee who wishes to look up details on worlds from other sources. G:RoF = Gurps Rim of Fire, G:IW = Gurps Interstellar Wars, TravWiki = the Traveller Wiki, CT10 = CT Supplement 10 Solomani Rim, DGP S&A = DGP's Solomani & Aslan, G:Core = Gurps Core book. Each is listed with a page number if relevant.

Galactic Directions

North and south can't be used of course for galactic directions. Instead, Traveller directions are related to the galaxy's core, rim, and the direction it spins. Coreward is towards the center of the galaxy. Rimward is towards the edge of the galaxy. Spinward is towards the direction the galaxy is spinning, Trailing is the opposite. On Traveller maps, Coreward is commonly towards the top, or north, Rimward to the bottom or south, Spinward to the left or west, and Trailing to the right or east.

Needs artwork!

Travel Zones

The Travellers' Aid Society does not yet exist in the Terran Dawn milieu. Since TAS classified travel zones, there are thus no Red or Amber zones. On the sector map you will however still see the classic red and yellow zone markers. In Terran Dawn, these have become 'War' and 'Hazard' zones. War zones are areas which have on-going "shooting" conflicts occurring. These are the front lines between pocket empires at war or worlds at war within themselves. Hazard zones are warnings to travellers that the area may be dangerous, often due to local social conditions such as a government in anarchy, a very low law level, or some sort of other social strife.

Who is responsible for reporting War and Hazard zones if there is no TAS? Local governments and news agencies. For example, the UNN (Union News Network) keeps its readers up-to-date on travel warnings issued by the Merchant's Aid Agency and the Enforcement Corps within the Old Earth Union. Within the Dingir League, the Navy's scouts report travel hazards. Local reporters of hazard zones could thus vary at the referee's discretion.

Author note: As pocket campaign guides are released, you may see the sector map receive more Hazard zones as these areas are more fully detailed. Currently, only the Dingir League and Old Earth Union areas have their Hazard zones placed. This document will be updated, check back for a future version with all of the Hazard zones placed.

Terran Dawn

WORLD CHARACTERISTICS

- No Water Present
- Water Present
- Asteroid Belt
- Brown Dwarf
- Gas Giant Present

BASES

- Naval Base
- Scout Base
- Way Station
- Cache

TRAVEL ZONES

- Hazard Zone
- War Zone

POPULATION

- no name under one million
- Secundus one million or more
- PRIMUS one billion or more
- Capitals are underlined

Determining Terran Dawn UWPs

The Gurps: Interstellar Wars book provided world descriptions for many, but not all, Solomani Rim worlds during the 1st Imperium (before this setting). Gurps: Rim of Fire and Classic Traveller sources provided world descriptions on the entire sector during the 3rd Imperium (after this setting). Physical UWPs didn't change of course. Social UWPs had several different considerations:

Population: *Real-world population growth trends were used as a base. In many cases, pre-Terran Dawn populations were not known, so reverse population growth was computed. Whether the world would become a poor place to live during the Long Night (mass exodus or death), or a good place to live (mass immigration) was considered.*

Government: *Author's selection. Some governments stayed the same as their past government, some were the same as their future government, some were completely different.*

Law: *Based on any references in world descriptions and previous/future law levels. Law levels weren't radically changed unless there was a good reason in the world description.*

Tech Level: *Several factors influenced TL. Future and past TL's were of course a consideration, placing the Terran Dawn TL between these two, but possibly slanted towards the lower of the two due to the Long Night. The tech advancement tables in T5 were a great source of guidance. The highest TL before the Long Night according to canon sources was TL 12 (MT: Referee's Companion). The Solomani Rim was not hit very hard by the Long Night according to canon. The Core Sector seemed to have dropped more than one TL (T4: Melieu 0). Thus, the author determined some Solomani Rim worlds of TL 12 before the Long Night would only drop to TL 11.*

Considering all of the above, the author came up with base equations for each of the social profiles which were further adjusted by the world's location (backwater area, within a pocket empire, near a pocket empire, etc). The equations weren't considered an exact science and were often tweaked while considering each individual world in the sector.

Out There

What is outside the Terran Rim? Little is known and based more upon rumors and old 1st Imperium information than current facts.

Coreward: These areas seemed to be harder hit by the Long Night. However, there are rumors of a growing pocket empire far off towards the Core Sector.

Rimward: This area received little attention during the Rule of Man. It remains highly unexplored and unsettled.

Spinward: Chaos, pirates, and lawlessness are reported immediately to Spinward sprinkled with ramshackle pocket states. There are rumors that one of these pocket states has a relatively high technology and trades with the Reavers' Alliance of the Terran Rim. If a traveller could traverse these dangerous area, they would eventually reach a great Aslan empire.

Trailing: Immediately to Trailing is a large area sparsely settled that was hit hard by the Long Night. Farther off is the domain of the Hivers. Little is known of the Hivers which were just being contacted as the Long Night fell.
